## **Announcement of Changes in 2023**

I am please to say that I am now officially semi-retired and will be passing along most of the MOTUS antenna and related products to Wisdom Atsu at his company called Intermod.

Wisdom will be responsible for manufacturing, sales, and shipping of our VHF and UHF MOTUS Yagi and omni-directional antennas.

By semi-retiring, I will be working with Wisdom directly for a period of time during the transition, and hopefully will have time to finish some of the new MOTUS related products that have been here on the design board for a while. I need to get back to my Engineering roots. We have some new and exciting products that will be added to our existing line of antennas, hopefully early in 2023.

I have known and worked with Wisdom for over 20 years now and feel confident he will be able to successfully continue supplying our MOTUS antenna products in the future.

Wisdom can be contacted at 416-835-8687 or email at [way@rfintermod.com](mailto:way@rfintermod.com)

We are both looking forward to a great 2023 year and look forward to working with you on your tracking antenna system needs.

Have a great 2023 tracking season .... Bob Morton
