[New Beginnings: More Reflections by Dolly, Christina Vaughan](#) , 1999, 0965811344, 9780965811347. From her heart & soul, Dolly has brought into being inspired, transcendent poetry for everyday living. The insightful theme of "New Beginnings" provides us with an outstanding model for self-help to heal toward forgiveness from abuse & from other pains in life & to help stop prejudice. Discover an inspirational perspective about the millennium on Page 5 of Dolly's second book of poetry, "New Beginnings." While reading, this reviewer experienced fresh realizations about innermost feelings & relationships. The work majestically stands on the threshold of changing concepts - from God to Adam & Eve to grandparents, parents, children & onward to many more issues. Dolly is not reticent about revealing personal past mistakes, mistakes anyone can make & providing guidance out of the night into the dawn of "New Beginning." Carefully blended & designed to stop prejudice & heal toward forgiveness, "New Beginnings" harmoniously merge to create a nova burst of heightened awareness & enjoyment for any reader. Starting with the present day Allagash Wilderness Waterway the reader is taken back through the logging operations of the nineteenth and twentieth centuries. Then on back to prehistoric times when Native Americans used the region in their yearly migrations. The book is a blend of fact and fiction, but the fiction is always based on facts.

[Homosexuality/Heterosexuality: Concepts of Sexual Orientation., , David P. McWhirter, Stephanie A. Sanders, June M.](#)

[Reinisch](#) , 1990, 0195052056, 9780195052053. What is the nature of sexual orientation and how does it develop? Ideas about erotic attraction have evolved with our society, reflecting changing concepts of masculinity, femininity, morality, and individual identity. Though the line between homosexuality and heterosexuality used to be sharply drawn, Kinsey's original research threw this practice into question, suggesting these labels stand as two poles on a continuum of human behavior. In this second volume of the Kinsey Institute Series, editors David P. McWhirter, June Machover Reinisch, and Stephanie A. Sanders have collected the work of distinguished researchers and clinicians in many fields who seek to understand what we have learned about the factors influencing sexual orientation, and what approaches and research tools are most appropriate in its investigation. Drawing on their experience and expertise, these contributors provide answers from many viewpoints--historical, biological, developmental, cultural, psychoanalytic, and even primate behavior. In particular, they examine what shapes and changes sexual orientation across cultures, lifespan, and species. This volume reflects research being done on many fronts to extend Kinsey's formulation of sexuality and investigate it more fully. Providing a critical presentation of traditional views as well as recent theory, Homosexuality/Heterosexuality is written for a readership of professionals and lay people, and will be useful as both a reliable fund of information and a source of innovative ideas on the study of human sexual behavior.

[Running to Paradise: Yeats's Poetic Art, Macha Louis Rosenthal](#) , 1997, 0195113918, 9780195113914. In Running to Paradise, M.L. Rosenthal, hailed by the Times Literary Supplement as "one of the most important critics of twentieth-century poetry," leads us through the lyric poetry and poetic drama of our century's greatest poet in English. His readings shed new, vivid light on Yeats's daring uses of tradition, his love poetry, and the way he faced the often tragic realities of revolution and civil war. Running to Paradise describes Yeats's whole effort--sometimes leavened by wild humor--to convey, with high poetic integrity, his passionate sense of his own life and of his chaotic era. Himself a noted poet, Rosenthal stresses Yeats's artistry and psychological candor. The book ranges from his early exquisite lyrical poems and folklore-rooted plays, through the tougher-minded, more confessional mature work (including the sublime achievement of The Tower), and then to the sometimes "mad" yet often brilliant tragic or comic writing of his last years. Quoting extensively from Yeats, Rosenthal charts the gathering force with which the poet confronted his major life-issues: his

art's demands, his persistent but hopeless love for one woman, the complexities of marriage to another woman at age 52, and his distress during Ireland's "Troubles." Yeats's deep absorption in female sensibility, in the cycles of history and human thought, and in supernaturalism and "the dead" comes strongly into play as well.

[Fundamental Concepts of Earthquake Engineering, Roberto Villaverde](#) , 2009, 1420064959, 9781420064957. While successfully preventing earthquakes may still be beyond the capacity of modern engineering, the ability to mitigate damages with strong structural designs and other mitigation measures are well within the purview of science. Fundamental Concepts of Earthquake Engineering presents the concepts, procedures, and code provisions that are currently being used to make structures as earthquake-resistant as is presently feasible. The book begins by describing the purpose, main aspects, and historical development of earthquake engineering and provides an overview of the type and extent of damage an earthquake can produce. It then introduces the concepts of seismology, the mechanisms of earthquake generation and propagation, and the difference between the various scales used to quantify the size of an earthquake and its potential to cause damage. The book also discusses the response spectrum and the different ways earthquake ground motions may be characterized and how local soil conditions may affect ground motion characteristics. Later chapters examine the design spectrum, conventional methods used to calculate the response of structures, soil-structure systems, and nonstructural components to earthquake ground motions. This comprehensive resource is certain to advance the knowledge of those tasked with taking preemptive action against the devastating effects of major, catastrophic earthquakes.

They thought Lucia enjoyed being here. They thought that was why she kept coming back. But they were asking the wrong thing. She had found what she was looking for she had found what she had been sent to discover but she had found out more besides. The question was what to do about it. The question was whether to do anything at all. In the depths of a sweltering summer, teacher Samuel Szajkowski walks into his school assembly and opens fire. He kills three pupils and a colleague before turning the gun on himself. Lucia May, the young policewoman who is assigned the case, is expected to wrap up things quickly and without fuss. The incident is a tragedy that could not have been predicted and Szajkowski, it seems clear, was a psychopath beyond help. Soon, however, Lucia becomes preoccupied with the question no one else seems to want to ask: what drove a mild-mannered, diffident school teacher to commit such a despicable crime? Piecing together the testimonies of the teachers and children at the school, Lucia discovers an uglier, more complex picture of the months leading up to the shooting. She realises too that she has more in common with Szajkowski than she could have imagined. As the pressure to bury the case builds, she becomes determined to tell the truth about what happened, whatever the consequences . . .

He wants hearts and souls that are shaped in vibrant faith and love toward God and others. How can parents cultivate this in their children? In this book Dr. Michelle Anthony shares practical examples and biblical insight on the spiritual role of parenting.Spiritual Parenting introduces the simple but revolutionary concept that parents are, by the power of Gods Spirit, to obey and depend on God in order to create an environment God can use to beckon their children to Him.

[Chair, Anne Massey](#) , 2011, 1861897588, 9781861897589. We sit on one every day in our home, school or office. Yet how often do we think about the origins of the chair or of its place in the world? This book provides an anatomy of the chair and its history, and even considers the predetermined ways in which we interact with others when seated, for a chair can communicate the authority of its owner, the sitter, and even the creator. During the last one hundred years it has become established as a revered object of design. Examples, such as the Eames Lounge Lounge chair, Verner Panton's S Chair, Herman Miller's Aeron office chair and Jasper Morrison' Air chair, have been photographed for glossy magazines, exhibited in art museums and galleries, and sometimes slavishly copied in knock-off cheaper models. Other, more humble, chairs have also reached iconic status, such as Van Gogh's Chair, or like Shaker chairs have become emblematic of a simpler and purer lifestyle. Charis have been crafted, constructed in a remarkable variety of traditional and synthetic materials, and mass manufactured, often locally but now increasingly in faraway factories for global distribution. This book elucidated the meaning of the chair in contemporary culture and of the nature of the relationship between this pivotal object and designers and manufacturers.Drawing on design and art, popular culture and personal experience, Chair is an engaging and informative biography of an everyday object, and will appeal to anyone interested in why we choose, or are made, to sit on the chairs we do.

Written over the last ten years, these essays focus on labour at the bottom of the rural economy, lacking social, economic, and political wherewithal, and their struggles to find a foothold in the urban economy. The author draws on his fieldwork from India, Indonesia, and China. The volume demonstrates that this extremely vulnerable group is largely excluded from a life of dignity, stability, and decent work and the recent policies of globalization have only worsened their prospects of escape from this wretched existence. This book is crucial to the debates about labour and development studies in the current climate of globalization. It raises and answers important

questions pertaining to the dynamics of life and work at the lower rungs of society.

[Keepin' It Real: School Success Beyond Black and White, Prudence L. Carter](#) , 2007, 0195325230, 9780195325232. Why

do so many African American and Latino students perform worse than their Asian and White peers in classes and on exams? Why might African American and Latino students be less engaged in school? Common wisdom holds that racial stratification leads African American and Latino students to rebel against "acting white," thus dooming themselves to lower levels of scholastic, economic, and social achievement. *Keepin' It Real* sets the record straight. Drawing on survey fieldwork and interview data from low-income Latino and African-American youth in New York, Prudence Carter here shows that African American and Latino youth are no different than other youths in valuing education as the key to economic mobility. Rather, resistance to "acting white" indicates a rejection only of the generic American, "white," middle-class styles of interaction, speech, dress, and musical tastes. Carter further demonstrates why some African American and Latino students thrive academically, and others do not. The most successful negotiators of our school systems are not necessarily those who assimilate into the dominant white mainstream, but rather those most adept at crossing the cultural divide. These students, who are potentially what she terms multicultural navigators, do not "act white" or "act black". Rather, these culturally savvy teens harvest resources from multiple traditions--whether it be knowledge of hip hop or of classical music--to strategically negotiate different expectations and achieve their high ambitions.

[Grassland: The History, Biology, Politics, and Promise of the American Prairie, Richard Manning](#) , 1995, 0140233881, 9780140233889. More than forty percent of our country was once open prairie, grassland that extended from Missouri to Montana. Taking a critical look at this little-understood biome, award-winning journalist Richard Manning urges the reclamation of this land, showing how the grass is not only our last connection to the natural world, but also a vital link to our own prehistoric roots, our history, and our culture. Framing his book with the story of the remarkable elk, whose mysterious wanderings seem to reclaim his ancestral plains, Manning traces the expansion of America into what was then viewed as the American desert and considers our attempts over the last two hundred years to control unpredictable land through plowing, grazing, and landscaping. He introduces botanists and biologists who are restoring native grasses, literally follows the first herd of buffalo restored to the wild prairie, and even visits Ted Turner's progressive--and controversial--Montana ranch. In an exploration of the grasslands that is both sweeping and intimate, Manning shows us how we can successfully inhabit this and all landscapes.

Dubbed 'the founder of modern geology' by Stephen Jay Gould, the 17th century Danish scientist Nicolaus Steno was the first man to suggest that the existence of fossils demanded a much longer history for the earth than the roughly six thousand years suggested by the Bible. Steno's work was ignored for over a century; he himself dropped his geological studies; he converted to Catholicism and later became a bishop; in 1988 he was beatified by the Pope. Alan Cutler tells the story of this passionate and fascinating man, exploring his remarkable ideas on science and religion and the way his work was eventually to transform Western ideas of time. Steno's influence was enormous; Cutler's book is the first to give him his due, and to set him alongside Copernicus, Galileo and Darwin.

From Anglo-Saxon to Early Middle English brings together eleven papers on aspects of English language and literature from the eighth to the thirteenth century, written in honor of E.G. Stanley, the recently retired Rawlinson and Bosworth Professor of Anglo-Saxon in the University of Oxford. The papers, written by eminent scholars from Britain, North America, New Zealand, and Germany, reflect the range of E.G. Stanley's work, examining philology, meter, and literary style. However, the focus of the volume is on the period of rapid change from late Anglo-Saxon to early medieval England, and the contributors consider in detail the ways in which both language and literary forms developed during this time. The volume contains a comprehensive bibliography of E.G. Stanley's publications, together with an account of his distinguished career.

The narrative tells why Martin and Israel leave their families in Mexico, the moral dilemmas they encounter due to drug trafficking crystal methamphetamine, and conveys a poignant homecoming. Settings for the novel include a sailboat navigating Catalina Island, The Casino at Avalon, Mazatln, and other locals along the Alta and Baja California coast. The inclusion of anecdotal events and persons shaping Mexico from Hernan Corts to Diego Rivera make the book informative and very entertaining.

This pharmacology handbook combines a "master systems" approach -- the interaction of the nervous, endocrine, and immune systems -- with illustrations for a unique, physiological presentation of basic pharmacological concepts. Instead of treating drugs as remedies for dysfunctional body tissues, this book presents drugs as chemicals mimicking the molecular languages of the body. The cartoon-like illustrations which accompany the molecular actions of drugs aid students in drug action recall and can help in patient teaching. This book covers cell language and pharmacology and the whole spectrum of drug types including Aldosterone and Diuretics, Insulin, Opiates, drugs to treat clotting disorders, drugs to treat allergies, and drugs to treat Cancer. Kiras shows how a number of different special operations, in conjunction with more conventional military actions, achieve and sustain strategic effect(s) over time. In particular, he argues that the root of effective special operations lies in understanding the relationship existing between moral and material attrition at the strategic level. He also presents a theoretical framework for understanding how special operations achieve strategic

effects using a unique synthesis of strategic theory and case studies. This study shows how the key to understanding how special operations reside in the concept of strategic attrition and in the moral and material nature of strategy. It also highlights major figures such as Carl von Clausewitz, Hans Delbrück, and Mao Zedong, who understood these complexities and were experts in eroding an enemy's will to fight. These and other examples provide a superb explanation of the complexities of modern strategy and the place of special operations in a war of attrition. This book will be of great interest to all students and scholars with an interest in special forces and of strategic and military studies in general.

It is also one that remains resistant to universal dogma, with a wide range of responses to women's social roles across the Islamic world. Reflecting this heterogeneity, the editor of this volume has assembled the latest research on the issue, which combines contemporary with historical data. The material comes from around the world as well as from Muslim and non-Muslim researchers. It takes in work from majority Muslim nations such as Bangladesh, Iran, Iraq, Lebanon, Pakistan, Palestine, Tunisia and Turkey, as well as countries with troubled interfaith relations such as India and Israel. Nations with minority Muslim populations such as France, the UK, Canada and Australia, are also represented. The work also features varying Islamic sub-groups such as the two main ones, Sunni and Shia, as well as less well known populations such as the Ismaili Muslims. In each case, the work is underpinned by the very latest socio-theological insights and empirical data.

[Logistics and Transportation: Design and Planning, Raja G. Kasilingam](#) , 1998, 0412802902, 9780412802904. Logistics is a \$700 billion industry in the USA and is the second largest employer of college graduates. Logistics costs account for nearly 30% of the sales dollar, and logistics activities are essential to satisfying the ever- changing customer demand in terms of variety and availability. Today the need for cutting edge, sophisticated logistics practices has never been greater. This unique text is squarely focused on the key activities within the functional areas of logistics and transportation, with emphasis placed on the quantitative treatment of the design and planning issues in logistics. In scope, Logistics and Transportation comprehensively covers almost all the elements of the supply chain. Moreover, it includes a number of topics that are generally not covered by most popular logistics texts. These include functional areas such as: vendor selection, inventory models with inventory costs, advanced transportation models, logistics metrics, and latest trends in logistics. The text is primarily designed for use in the classroom by senior undergraduate and graduate-level students. It is also a useful resource for practicing transportation and logistics professionals. Readers will appreciate the references for recommended further reading, related training aids and problem sets given at the end of each chapter, as well as the two comprehensive logistics cases presented at the end of the text.

Jean and Spence Collins step out of the corporate mainstream-and right into a world of magic after an innocent purchase at an estate sale. Life isn't what they think it is. After thirty-two years in the corporate grind, Jean and Spence Collins are ready for a magical time-out when they move back to Portland, Oregon. And that's just what they get when Jean buys an old chest at the estate sale of Mary Coulter, an elderly widow. The chest's false bottom hides an ancient eighteen-inch piece of fabric that begins acting strange-the three magnificent birds on it change. And they're about to change the Collinse's lives too. At the touch of her most treasured possessions to be sold, Mary Coulter is ready to let go and move into a senior living community. But she's not ready to give up on her potential journey to immortality. The magical fabric holds the key, but she can't find it. Mary's greedy son, Raleigh, wants to get his hands on the fabric too-he needs money fast. An FBI agent has his eye on Raleigh for insider trading. And Raleigh has his eye on the Collinse. Jean and Spence track down Mary Coulter, who knows of the fabric's powers-but not all its secrets. With Raleigh and the FBI on their heels, Jean and Spence set off on a transforming quest to London, and finally to Cairo, to unlock the fabrics secrets of life. But living with magic comes with a responsibility: for every one thing they give, numerous rewards will come their way. STITCHES is the debut novel of a series that follows the scintillating trail Jean and Spence leave in their wake as they sleuth their way toward retirement - with a little immortal help. It celebrates a new coming-of-age story: the adventurous spirit of the boomers who want to put away the remote and run to the next phase of life. A penetrating analysis of the close relationship between public health and human rights, this book makes a compelling case for synergy between the two fields. Using the AIDS pandemic as a lens, the authors demonstrate that health is closely related to human dignity and individual rights--human

rights cannot be deemed adequate and comprehensive without ensuring the health of individuals. In the course of their analysis, Gostin and Lazzarini tackle some of the most vexing issues of our time, including the universality of human rights and the counter-claims of cultural relativity. Taking a cue from environmental impact assessment, they propose a human rights impact assessment for examining health policies--a tool that will be invaluable for evaluating real-world public health problems. This volume examines issues--HIV testing, screening, partner notification, isolation, quarantine, and criminalization of persons with HIV/AIDS--within the framework of international human rights law. The authors evaluate the public health implications of a wide range of AIDS policies in developed as well as developing countries. The role of women in society receives special emphasis. Finally, the book presents three case histories significant in the HIV/AIDS pandemic and analyzes them from a human rights perspective. The cases include discrimination and the transmission of HIV and tuberculosis in an occupational health care setting; breast feeding in the least developed countries; and confidentiality and the right of sexual partners to know of potential exposure to HIV. Gostin and Lazzarini have written a book that will be a valuable addition to the libraries of public health practitioners, legal scholars, bioethicists, policy makers, and public rights activists.

[Epistemology Futures, Stephen Cade Hetherington](#) , 2006, 0199273324, 9780199273324. How might epistemology build upon its past and present, so as to be better in the future? Epistemology Futures takes bold steps towards answering that question. What methods will best serve epistemology? Which phenomena and concepts deserve more attention from it? Are there approaches and assumptions that have impeded its progress until now? This volume contains provocative essays by prominent epistemologists, presenting many new ideas for possible improvements in how to do epistemology.

Doubt is cast upon the powers of conceptual analysis and of epistemological intuition. Surprising aspects of knowledge are noticed. What is it? What is it not? Scepticism's limits are traced. What threatens us as potential knowers? What does not? The nature and special significance of inquiry, of normative virtues, of understanding, and of disagreement are elucidated, all with an eye on sharpening epistemology's future focus. There is definite insight and potential foresight. How might real epistemological progress occur in the future? Epistemology Futures offers some intriguing clues.

[The Cold War and the Color Line: American race relations in the global arena, Thomas BORSTELMANN, Thomas Borstelmann](#) , 2009, 0674028546, 9780674028548. After World War II the United States faced two preeminent challenges: how to administer its responsibilities abroad as the world's strongest power, and how to manage the rising movement at home for racial justice and civil rights. The effort to contain the growing influence of the Soviet Union resulted in the Cold War, a conflict that emphasized the American commitment to freedom. The absence of that freedom for nonwhite American citizens confronted the nation's leaders with an embarrassing contradiction. Racial discrimination after 1945 was a foreign as well as a domestic problem. World War II opened the door to both the U.S. civil rights movement and the struggle of Asians and Africans abroad for independence from colonial rule. America's closest allies against the Soviet Union, however, were colonial powers whose interests had to be balanced against those of the emerging independent Third World in a multiracial, anticommunist alliance. At the same time, U.S. racial reform was essential to preserve the domestic consensus needed to sustain the Cold War struggle. The Cold War and the Color Line is the first comprehensive examination of how the Cold War intersected with the final destruction of global white supremacy. Thomas Borstelmann pays close attention to the two Souths--Southern Africa and the American South--as the primary sites of white authority's last stand. He reveals America's efforts to contain the racial polarization that threatened to unravel the anticommunist western alliance. In so doing, he recasts the history of American race relations in its true international context, one that is meaningful and relevant for our own era of globalization. The End of the Cold War and White Supremacy Epilogue Notes Archives and Manuscript Collections Index Reviews of this book: In rich, informing detail enlivened with telling anecdote, Cornell historian Borstelmann unites under one umbrella two commonly separated strains of the U.S. post-WWII experience: our domestic political and cultural history, where the Civil Rights

movement holds center stage, and our foreign policy, where the Cold War looms largest...No history could be more timely or more cogent. This densely detailed book, wide ranging in its sources, contains lessons that could play a vital role in reshaping American foreign and domestic policy.--Publishers WeeklyReviews of this book: [Borstelmann traces] the constellation of racial challenges each administration faced (focusing particularly on African affairs abroad and African American civil rights at home), rather than highlighting the crises that made headlines...By avoiding the crutch of "turning points" for storytelling convenience, he makes a convincing case that no single event can be untied from a constantly thickening web of connections among civil rights, American foreign policy, and world affairs.--Jesse Berrett, Village VoiceReviews of this book: Borstelmann...analyzes the history of white supremacy in relation to the history of the Cold War, with particular emphasis on both African Americans and Africa. In a book that makes a good supplement to Mary Dudziak's Cold War Civil Rights, he dissects the history of U.S. domestic race relations and foreign relations over the past half-century...This book provides new insights into the dynamics of American foreign policy and international affairs and will undoubtedly be a useful and welcome addition to the literature on U.S. foreign policy and race relations.

[The Golden Door, Tom Milton](#) , 2012, 0983941211, 9780983941217. Maya Mndez, who has lived with her family in Alabama for fifteen years as an illegal immigrant, suddenly faces an uncertain future when the state passes an immigration law that will make it a crime for her parents to work and will prohibit her from attending a public university. Maya has recently graduated from high school, and in two months she plans to start at the University of Alabama, which recruited her for the women's soccer team before the law was passed. Since the law doesn't become effective until after the fall semester begins, and since it might be stopped by challenges, Maya goes to Tuscaloosa in early August to join the soccer team for practice. Meanwhile, she finds herself in the middle of a conflict between her parents since her father still wants to pursue his dream of living in America and her mother wants to go back to Mexico. As the months pass and

the law moves through the court system, Maya becomes a key player on a soccer team that has its most successful season in years, but the spirit of the law eventually catches up with her family, and out of its tragic consequences she struggles to find a mission in life.

[Many Globalizations: Cultural Diversity in the Contemporary World, Peter L. Berger, Samuel P. Huntington](#) , 2002, 0195168828, 9780195168822. Much discussed but poorly understood, globalization is at once praised as the answer to all the world's problems and blamed for everything from pollution to poverty. Here Berger and Huntington bring together an array of experts who paint a subtle and richly shaded portrait, showing both the power and the unexpected consequences of this great force. The stereotypes of globalization--characterized as American imperialism on the one hand, and as an economic panacea on the other--fall apart under close scrutiny. Surveying globalization from individual countries of the five major continents, Many Globalizations shows that an emerging global culture does indeed exist. While globalization is American in origin and content, the authors point out that it is far from a centrally directed force like classic imperialism. They examine the currents that carry this culture, from a worldwide class of young professionals to non-governmental organizations, and define globalization's many variations as well as sub-globalizations that bind regions together. Analytical, incisive and stimulating, Many Globalizations offers rare insight into perhaps the central issue of modern times, one that is changing the West as much as the developing world. "Provocative.... Taken together, the trenchant, well-written essays included in this collection provide indisputable evidence that an identifiable global culture is indeed emerging."--World Policy Journal "Analytical and penetrating, belongs...on the desks of anyone with an abiding interest in the forces shaping the world."--Publishers Weekly

[David Sorensen: The Ultimate Horizon, David Sorensen, Sandra Grant Marchand, Verona Sorensen, Galerie McClure](#) , 2012, 0986593354, 9780986593352. David Sorensen (1937-2011) was a major Canadian artist known for his ability to reconcile abstract expressionism with a Turner-like inspiration of light and sky. While clearly aware of and influenced by the art movements and contemporary concerns of his time, Sorensen remained steadfastly committed to the pursuit of a "classical order free of irony." This volume documents Sorensen's final works, a series of colour field abstractions exploring the horizon leitmotif. An original essay by one of North America's most noted curators is accompanied by a statement from the artist's daughter.
