[Almost Grown: Launching Your Child from High School to College, Patricia Pasick](#) , 1998, 0393317102, 9780393317107. Almost Grown is a guide for parents to the final years of high school and first years of college, offering intelligent counsel not only in practical issues such as developing a college search plan or handling questions of money, sex, and substance abuse, but also in the psychological issues that arise during this family transition. Writing as both psychologist and parent, Patricia Pasick tackles the key question of how mothers and fathers can foster adolescents' growth and autonomy while maintaining family connections and stability. She also explores the unexpected: the impact of the changing family on younger siblings, the benefits and frustrations of college students' returning home, the challenges and opportunities that nontraditional families face, and more. Pasick delves into another critical yet underplayed aspect of the college transition: how parents' lives change. Almost Grown guides readers through this major step in adult development and new start to adult partnerships. Almost Grown contains advice from high school and college admissions counselors across the country and, at the heart of the book, stories of personal experience from parents and adolescents who are making, or have made, the transition.

Although this technology is essentially mathematical and statistical, the authors do not immerse the reader in complex analysis, but rather provide simple heuristic explanations and references to the original proof, and illustrate the theory by analogies drawn from everyday experience. To give practical experience in application of the techniques, exercises are provided at the end of each chapter, complete with detailed worked answers.

[The Modularity of Mind: An Essay on Faculty Psychology, Jerry A. Fodor](#) , 1983, 0262560259, 9780262560252. This

study synthesizes current information from the various fields of cognitive science in support of a new and exciting theory of mind. Most psychologists study horizontal processes like memory and information flow; Fodor postulates a vertical and modular psychological organization underlying biologically coherent behaviors. This view of mental architecture is consistent with the historical tradition of faculty psychology while integrating a computational approach to mental processes. One of the most notable aspects of Fodor's work is that it articulates features not only of speculative cognitive architectures but also of current research in artificial intelligence.

In an updated edition of his hugely successful student introduction to English literature from 1100 to 1500, J. A. Burrow takes account of scholarly developments in the the field, most notably devoting a final chapter to the impact of historicism on medieval studies. Full of information and stimulating ideas, and a pleasure to read, Burrow's book deals with circumstances of composition and reception, the main genres, 'modes of meaning' (allegory etc.), and medieval literature's afterlife in modern times. It shows that the literature of authors such as Chaucer, Gower, and Langland is more readily accessible than usually imagined, and well worth reading too. By placing medieval writers in their historical context - the four centuries between the Norman Conquest and the Renaissance - Professor Burrow explains not only how they wrote, but why.

Chicago's own Joe Peterson is back with a strikingly original novel that is at once both mythic and fanciful. It is a narrative poem that recounts the life of Irishman Jim O'Connor, a tragic figure who was born with a preternatural gift for poetry, that brought him early fame, but he is also an alcoholic who had his first blackout drunk at 12 years of age. The stanzas of the novel

recount Jim's tragic exploits as he leaves a wake of dark destruction in his midst. The ghost of his ex-girlfriend Anne, killed in a car crash on a slick, snowy road with Jim driving after an acute drinking binge, haunt Jim to the end of his days.

[Strategic Customer Management: Strategizing the Sales Organization, Nigel F Piercy, Nikala Lane](#) , 2009, 0199544506, 9780199544509. A revolution is taking place in the way companies organize and manage the 'front-end' of their organization, where it meets its customers. Traditional concepts of sales management, account management, and customer service are being overtaken by initiatives like customer business development, the strategic sales organization, and strategic customer management. This book aims to provide insights into how this revolution is unfolding and to provide a framework for executives and management students to address the issues involved. The book focuses on the transformation of the traditional sales organization into a strategic force leading the strategic customer management process in companies. Traditionally, the area of sales management has mainly been treated as a tactical, operational topic in the conventional marketing literature - simply part of the communications mix within the planned marketing programme. However, the emergence of major customers as dominant buyers in many sectors as a result of pressures towards consolidation and enhanced scale of operations, is changing the way in which sales issues are addressed in supplier organizations. The growth of new forms of buyer-seller relationship based on collaboration and partnering has encouraged organizations to reconsider the sales and account management operation as an important source of competitive differentiation in commoditized markets. Increasingly, sales is being perceived as a central part of business strategy and attention given to the challenges in better aligning sales processes with strategy. This has many implications for the design of the sales organization and its management strategy, which go far beyond the confines of conventional marketing views.

The arts have become an essential component of the post-Fordist production process and have to a large degree lost their autonomy. Taking up the challenge of the views of Virno, Hardt and others concerning the place and function of art in society, this book's authors consult high-profile international figures from various artistic disciplines and endeavour to gain insight into the changing circumstances in which today's creative processes arise and take shape.

The authors approached about eighty journalists and writers based in Johannesburg and asked them to write short pieces about the city in which they work and live. They did not specify form or style-the contributors were free to express themselves however they wanted to. Out of this has emerged fifty-odd pieces of writing that reflect aspects of the city, idiosyncratic reactions to living and working here, appreciations of small and big things, some poems, some criticisms-all will find resonance with Jo'burg/Jozi residents and all will be enlightening and entertaining to others hoping to learn something about the metropolis. Amazingly, many of the contributors expressed how much they enjoy being in Jo'burg/Jozi-good news for a city that consistently suffers from bad press. Both editors and contributors gave their work and time free of charge. All royalties are donated to a local charitable organisation.

[The Bread of Time: Toward an Autobiography, Philip Levine](#) , 2002, 0472086251, 9780472086252. The Bread of Time is an amalgam of celebration and quest. In this memoir, Philip Levine celebrates the poets who were his teachers--particularly John Berryman and Yvor Winters, writers whose lives and work, he believes, have been misunderstood and misinterpreted. In the process of writing this account of his childhood and young manhood in Detroit and of his middle and later years in California and Spain, Levine came to realize that he was also engaged in a quest, striving to discover "how I am." The resulting work provides a double-edged revelation of the way writers grow. Witty and elegantly rendered in a prose that is as characteristically Levine's as his verse, this is superb--and essential--reading for anyone interested in contemporary poetry and poets. Philip Levine has received many awards for his books of poems, most recently the National Book Award for What Work Is in 1991 and the Pulitzer Prize in Poetry for The Simple Truth in 1995. Levine recently retired from the University of California, Fresno.

[Best Laid Plans, Rob Stone](#) , 2010, 0955829933, 9780955829932. The catalogue explores the use of different forms of drawing to create models for alternative ways of living in or viewing the modern world. It includes essays, excerpts of conversations between the artists, documentation of commissioned works, and interventions by the artists. The artists in

the exhibition use different forms of drawing to create models for alternative ways of living in or viewing the modern world. Strategic planning is associated with 'objective' graphic forms such as maps, diagrams, graphs, charts and sketches. Turning such a notion on its head, the works in the exhibition explore fantastical scenarios, impossible geographies, new beings and habitats and subtle subversions of life as we know it. The international artists in Best Laid Plans exploit the positive potential of human fallibility and explore it as a force for imagining new forms of organisation and existence. The simplicity and directness of drawing means that it comes readily to the service of the telling of myths and fables, perfect allegorical means to convey ideas and messages. Published on the occasion of the exhibition Best Laid Plans at Drawing Room, London, November 2010 - January 2011.

[Viking Navigation, Sren Thirslund](#) , 2007, 8785180386, 9788785180384. How was the Norse Navigator able to shape his course across the North Atlantic long before the invention of the magnetic compass? This book tells the story of the Viking Sun Compass and how it allowed the Vikings to sail across the Atlantic. In 1948, the Danish archaeologist C.L. Vebaek found the remains of a small wooden disc at the Viking Age site of Uunartoq in Greenland. Since then the Master mariners Carl V. Sver and Sen Thirslund have interpreted this find as a navigational instrument. This book is the essence of more than forty years of archaeological studies, discussions and practical sea-going experiments. The author gives a full account of the history of the find and demonstrates convincingly how Viking Age Navigators could make use of this and other simple devices in order to find their way across the vastness of the Northern Atlantic.

This book offers lifelines for pastors serving toxic and dysfunctional congregations. A culture of triage engulfs mainstream religion in America. More and more churches are either toxic or dysfunctional. These churches contribute to the chronic decline of membership and burnout of clergy. Such churches cannot be "fixed" by even sincere or competent pastors without listening to God's guidance, insightful diagnosis, healing and conversion, revision, and supportive attention. Pastors did not sign on for this kind of ministry, but growing numbers find themselves in the throes of a life and death struggle for the soul of their church. This book will offer the vision, dynamics, and programming necessary for regenerating impaired congregations.

But few fans, if any, could possibly identify with the anguish and turmoil that blighted his life. As he fought to clear his name from these totally false allegations, supported by his loyal wife Ann, who will also reveal her thoughts, Dave lost his job and, tragically, his father. What he didn't lose was his determination to tell his side of the story, even in the face of threats from those who sought to finish him. Now, in unprecedented detail, Dave reveals the effect the traumatic episode had on him and his family, identifies those he believes were responsible - and explains how, against all the odds, he picked up the pieces and resumed a highly successful managerial career.

[The Gi Offensive in Europe: The Triumph of American Infantry Divisions, 1941-1945, Peter R. Mansoor](#) , 2002, 0700612262, 9780700612260. The German Wehrmacht was one of the most capable fighting forces the world has ever known, but in the end it was no match for the Allies. Some historians contend that the Allies achieved victory through brute force and material superiority. But, as Peter Mansoor argues, all of the material produced by U.S. industry was

useless without trained soldiers to operate it, a coherent doctrine for its use, and leaders who could effectively command the formations into which it was organized. This book provides a comprehensive study of America's infantry combat performance in Europe during World War II, showing that the Army succeeded by developing combat effective divisions that could not only fight and win battles, but also sustain that effort over years of combat. While American industry admittedly enabled the U.S. to sustain its overseas armies, the effectiveness of those forces ultimately rested on their organizational capabilities and ability to adapt to combat in a variety of lethal environments and to learn from their mistakes. Mansoor analyzes the impact of personnel and logistical systems on the Army's strength, explaining how leaders used these systems to keep a small number of divisions at a high state of combat effectiveness. During the critical battles of 1944-45, American divisions were able to sustain this high level while their Wehrmacht counterparts disintegrated, demonstrating that the Army's endurance in extended combat was the most critical factor in its ultimate success. Mansoor also takes a close look at the personalities and capabilities of division commanders, infantry tactics and operations, logistics, and the benefits and weaknesses of stateside training. The American army won, asserts Mansoor, because unit for unit at the division level it was more effective than its adversaries. By showing how U.S. infantry developed more quickly and fought better than commonly believed, *The GI Offensive in Europe* contributes significantly to the history of the U.S. Army in the European theater and to our overall understanding of military effectiveness. .

[Billie's Kiss, Elizabeth Knox](#) , 2003, 0099437546, 9780099437543. With an Edwardian twist on *THE TEMPEST*, and all the surprising, earthy and magical qualities of her successful *The WINTER'S LUCK*, Knox's equally irresistible new novel is set on the remote, divided Scottish island of Kissack and Skilling, one half of which looks historically and geographically towards Catholic Ireland, the other towards the Protestant north and Scandinavia. In the spring of 1903 a ship explodes as it docks on the island, drowning many of the passengers and crew in the icy waters of Stolsay harbour. Young, strawberry-blond-haired Billie Paxton is among the only survivors. Clumsy, illiterate and suddenly alone, Billie will not say why, before the explosion, she jumped from ship to shore, and so falls under the immediate suspicion of her fellow passenger, Murdo Hesketh, and his cousin and employer, Lord Hallowhulme, who owns the island - and has controversial plans for improving the lives of its inhabitants. As she attempts to come to terms with her now uncertain future, Billie acquaints herself with the peculiar inhabitants of Kiss Castle: Lord Hallowhulme's beautiful wife and worldly children; Geordie Betler, a spinsterish gentleman's gentleman who wants to discover why his brother drowned; and the fierce, fair-haired Murdo, who inspires in Billie equal amounts of rage and attraction.

Rather than explaining typical strategies for overcoming fear, this book focuses on examining how fear is experience, how to recognize that experience as nothing more than conditioned reaction to circumstance, and how to mentor oneself into letting go of beliefs about "appropriate" responses to fear. The notion is debunked that fear is anything other than a label we have learned to put on a set of physical and emotional responses, which is a Buddhist view of emotion in general.
