Aircraft noise has adverse impacts on passengers, airport staff and people living near airports, it thus limits the capacity of regional and international airports throughout the world. Reducing perceived noise of aircraft involves reduction of noise at source, along the propagation path and at the receiver. Effective noise control demands highly skilled and knowledgeable engineers. This book is for them. It shows you how accurate and reliable information about aircraft noise levels can be gained by calculations using appropriate generation and propagation models, or by measurements with effective monitoring systems. It also explains how to allow for atmospheric conditions, natural and artificial topography as well as detailing necessary measurement techniques.

A man who is now holding Jason's grandfather hostage, and threatening the world's very existence. Jumping through time with his best friend and body guard, Jason must enter the world of Medieval England, learn its customs, navigate unimaginable danger, and help Henry VII win the Battle of Bosworth, in the name of finding his grandfather, rescuing a beautiful girl from the clutches of a corrupt church, and destroying the one man who pledges to turn history inside out.

[The Terror of Living: A Novel, Urban Waite](#) , 2011, 0316122114, 9780316122115. Phil Hunt is in deep trouble. Hunt is on the run from two men: Drake, the deputy sheriff who intends to catch him, and Grady, the vicious hitman who means to kill him. For twenty years Hunt has lived in Washington State, raising horses with his wife on his small farm. He's tried to stay out of trouble, wanting only to make a living and taking the occasional illicit job in order to do so. Then his last delivery goes horribly wrong, and the chase is on from the mountains down into the Puget lowlands. To have any chance of rescuing his quiet life, Hunt will have to deal with deputy sheriff Bobby Drake, a good man determined to make up for his father's tainted legacy and Grady Fisher, a very bad man intent on making a name for himself in the most violent ways. With a fondness for blood, Grady takes pleasure in the use of knives, taking Hunt's life apart piece by piece, all the while leaving a trail of victims across the state. Relentless and gorgeously written, with original characters and a vividly powerful sense of place, *The Terror of Living* heralds the arrival of a writer who will be compared with the great suspense novelists.

[The Female Power Within: A Guide to Living a Gentler, More Meaningful Life, Marilyn Graman, Maureen Walsh](#) , 2002, 0971854823, 9780971854826. 'The female power within' outlines a step-by-step process for coming to know yourself intimately and deeply and encourages you to rediscover the perceptions, patterns, pleasures, and power of being female by moving beyond your foremothers and beyond the lives of men as well. Women today are so busy that we often don't even have time to ask ourselves, 'Is this what I want to be doing? Am I happy in my life? Is this it?' Hundreds of original 'Uncoverings' and reflective questions will help you see how you've been measuring yourself by 'scorecards' that don't make sense for you and to get so clear that the life you want begins to flow toward you. Many women describe the process as nothing short of miraculous as you embrace what comes naturally, what brings you pleasure, what you already do with ease, what you enjoy and what is fun. Graman and Walsh bring more than 50 years of experience to their guidebook for women who are quietly yearning to express a softer, more tender side in their lives. The world, they

say, is thirsty for our female power, likening it to an peaceful energy source that has been dimmed too long.

[Novel Ideas: Contemporary Authors Share the Creative Process, Barbara Shoup, Margaret-Love Denman](#) , 2009, 0820332798, 9780820332796. Novel Ideas provides a substantial introduction to the elements of fiction followed by in-depth interviews with successful novelists who speak with candor and insight into the complex process by which a novel is made. This edition includes new and updated interviews as well as writing exercises to enhance its use in the writing classroom. Dorothy Allison recalls "deliciously self-indulgent" days of writing in her bathrobe, wrapped in misery and exultation; Peter Cameron explains how he made the move from short fiction to the novel with the aid of a music composer's notebook to track the movement of his characters. Writers as different as Ha Jin, Jill McCorkle, Richard Ford, and Michael Chabon describe their unique approaches to their work while consistently affirming the necessity of committing to the hard effort of it while also remaining open to surprise. Aspiring novelists will find hands-on strategies for beginning, working through, and revising a novel; accomplished novelists will discover new ways to solve the problems they face in process; and serious readers of contemporary fiction will enjoy a glimpse into the way novels are made. What would you do if an irresistibly desirable but utterly untouchable woman whispered to you, If you want me, you'll have to come and get me? That's exactly the situation that Elliott Foster, CEO of Foster MacKenzie, finds herself in when she meets the alluring Lauren Collier, Chief

Legal Counsel of a Fortune 500 company. Elliott never has a shortage of attractive women willing to share her bed, and she doesn't care if they are attracted to her or just her money. By her rules, if two women are attracted to each other there's no reason why they shouldn't spend the night together-or in some cases, the afternoon. Lauren, intriguing but decidedly off-limits, doesn't fit the mold and Elliot knows she should walk away. Instead she finds herself in the unusual position of pursuing another woman, and even more disconcertingly...on Lauren's terms.

In the winter of that year, more or less coincidentally, the iconic culinary figures James Beard, M.F.K. Fisher, Julia Child, Richard Olney, Simone Beck, and Judith Jones found themselves together in the South of France. They cooked and ate, talked and argued, about the future of food in America, the meaning of taste, and the limits of snobbery. Without quite realizing it, they were shaping today's tastes and culture, the way we eat now. The conversations among this group were chronicled by M.F.K. Fisher in journals and letters some of which were later discovered by Luke Barr, her great-nephew. In Provence, 1970, he captures this seminal season, set against a stunning backdrop in cinematic scope complete with gossip, drama, and contemporary relevance.

[Becoming Others, Jerry Craven](#) , 2010, 0981989829, 9780981989822. Becoming Others collects new poems and poems selected from publications over a long poetic career. The poems are personal and intense expressions of feelings, finely crafted, with attention to imagery, sound, and rhythm. Craven writes in the tradition of Robert Browning and other poets who assume voices: poems are staged as dramatic monologues and soliloquies, so the speaker might or might not be the poet's own personal voice. What all of the voices have in common is a lyric sensibility that lets the world sing and uncovers new ways of seeing at every turn. Craven is "an artist of becoming others," a storyteller with an eye for detail and an ear for lyric. In this collection, the many selves he has gathered "take a rhythmic stage in chiming words," the poet exits "wearing many faces," and that makes these poems a joy to read.

[The Divine Home: Living with Spiritual Objects, Peter Vitale](#) , 2008, 0307405214, 9780307405210. For the millions of Americans combining the spiritual and the decorative in their homes from dramatic crosses in a modern log cabin to handcrafted Native American spirit masks in a sprawling Southwestern ranch this beautifully rendered book of interior design depicts how the serene touch of religious design elements can be effortlessly incorporated with a modern sensibility. Whether as a reflection of fervent belief, a secular nod to nostalgia, or a purely aesthetic choice, devotional objects such as religious idols, crosses, and Buddha statues have a profound visual power. Within these pages are thirty homes in which works inspired by religious traditions form a vital and varied part of the sumptuous and serene design of these spaces. Some of the people featured in this dramatic book collect with a geographic interest, some define their collections stylistically, and still others choose a historical framework. Yet all of the residences share a distinctly personal touch. Personality, in fact, runs rampant through these interiors that tell stories about the owners, the objects, and the houses themselves, such as CeCe Cords sunny Texas residence, John Saladinos calm California villa, Kelly Kleins soaring

Manhattan loft, and Adrienne Vittadini's richly textured Florida home. While some of the residents have personal spiritual connections with their pieces like a Santa Fe psychoanalyst and his varied collections of Outsider art, African works, and Judaica others merely find in the antiquities a sense of beauty and comfort. An interior designer who updated a rustic Colorado cabin is drawn to decorating with crosses for their geometric appeal as opposed to their religious connotations. In New York and Los Angeles, two different homeowners escape their busy lives in peaceful, calming environments created with Asian art. While the religious or spiritual elements are quite pronounced, they blend seamlessly into fascinating, eye-catching hybridized environments from French Provençal to Spanish Colonial to light, airy patrician. Each residence captured by one of the most sought-after interior photographers will enchant you with its beauty and originality and perhaps inspire you to begin a spiritual collection of your own. A collection, as these homeowners explain, starts with one artwork, but it is one piece that can lead to a magnificent obsession.

[Hegel and Aesthetics, William Maker](#) , 2000, 0791445526, 9780791445525. Hegel's Lectures on Aesthetics present a systematic and historical overview of the nature and development of art in light of its meaning and philosophical significance. This book considers Hegel's aesthetics from a variety of perspectives. With a strong and clear introduction by William Maker, the individual essays address Hegel's treatment of music, painting, comedy, and architecture, as well as his earlier writings on art, his relations to Schiller and to Schlegel, his treatment of romanticism, the place of aesthetics in the system, and his controversial claims about the overcoming of art. Several perspectives focus specifically on the contemporary relevance of Hegel's aesthetics in light of developments in art since his time, and especially in connection with modernism, postmodernism, and deconstruction.

This recollection begins with a German family's lives at the beginning of World War I. It is leading into memories of growing up in Berlin after World War II, when times were different. The war was over, Berlin was mostly rubble and the Cold War period began. The Berlin Blockade and the construction of The Wall placed the city in the center of the Cold War. A difficult place to be. Read through hardships, challenging conditions and the strict society of the times. Eventually Heidi's adventurous spirit emerges, reminding us that we are stewards of our own destiny.

He didnt set out to be a Silicon Valley icon, a business visionary, or even a billionaire. But he became all three. It turns out that business is a mosaic of interesting puzzles like managing risk, developing and reversing strategies, and looking into the future by deconstructing the past.As a founder of NetApp, a data storage firm that began as an idea scribbled on a placemat and now takes in \$4 billion a year, Hitz has seen his company go through every major cycle in businessfrom the Jack-of-All-Trades mentality of a start-up, through the tumultuous period of the IPO and the dot-com bust, and finally to a mature enterprise company. NetApp is one of the fastest-growing computer companies ever, and for six years in a row it has been on Fortune magazines list of Best Companies to Work For. Not bad for a high school dropout who began his business career selling his blood for money and typing the names of diseases onto index cards.With colorful examples and anecdotes, How to Castrate a Bull is a story for everyone interested in understanding business, the reasons why companies succeed and fail, and how powerful

lessons often come from strange and unexpected places. Dave Hitz co-founded NetApp in 1992 with James Lau and Michael Malcolm. [The Dance Information Sourcebook 2007, Cheryl Obal, DanceInfoSource](#) , 2007, 0979257409, 9780979257407. The Dance Information Sourcebook is an unprecedented 344 page career guide for aspiring dancers, written by professional dancer, singer, actress, teacher, and choreographer Cheryl Obal. Throughout her career, dance jobs took the author to

49 different countries and 45 US States, and everywhere she went, she took extensive notes on her experiences and collected dance job contacts. Wanting to help young aspiring dancers achieve their dreams, Obal decided to turn this gold mine of a notebook into a career reference for dancers. This book is the only one of its kind, and has become an irreplaceable resource for anyone who wants to succeed as a professional dancer. This book features extensive information about the dance scenes in all major American cities where a dancer can make a living by performing: New York, Los Angeles, Las Vegas, Chicago, Orlando, FL, and Branson, MO. There are also interviews with 20 additional professional dancers, including Broadway performers, casting directors, and choreographers, who Obal asked to give advice from the business perspective of succeeding as a performer. There is career advice about many topics on dancers minds, including: How do I get a dance job? What avenue should I take with my career? What is the best city to live in and pursue my performing goals? What can I do to support myself while I am looking for a dance job? How do I format my resume? How do I make a demo video? Can I get a job from a demo video? Should I go Union or stay non-Union? How do I save money on my taxes?...and many more. This book covers extensively all major avenues that a dance career can take, different types of jobs a dancer can have, and even lists specific venues continually hiring dancers. The contact information for all of these job possibilities throughout the country and abroad is provided. These include jobs for dancers in Musicals, Broadway Shows, National Tours, Dance Companies, Theme Parks, Cruise Ships, Production Shows, International Shows, and more. This book gives dancers honest, positive, inspiring advice and never-before-seen insight into the world of a professional dancer, in addition to giving dancers the information they need to succeed. When author Cheryl Obal started out as a dancer, there was no such resource. How to achieve success as a professional dancer seemed like a huge secret meant for only the lucky few. She found it disappointing that no dance schools throughout her training ever made a point to educate dancers on the business aspects of having a successful dance career. Even now, there is an abundance of excellent physical training, but a lack of ample practical training in the world of dance. That is why, after achieving success, Cheryl wrote this book- so that other young hopefuls wouldn't also have to wonder how to successfully lead the life of a professional dancer. The Dance Information Sourcebook is in a convenient and easy to use CD-rom format. Author Cheryl Obal set it up this way for two reasons: The compact format makes it easy for dancers, who are always traveling, to transport this valuable resource. Also, in this format, Obal can easily update information about the ever-changing world of dance. Educational institutions have already caught on to the usefulness of this book, and it is being used as a textbook in two University dance programs. In addition, it is used by many dance teachers, professional dancers, and aspiring dancers all over the United States.

[Earthdawn Gamemaster's Guide, 3rd Edition, Carsten Damm, James D. Flowers](#) , 2009, 1906508607, 9781906508609. Before science, before history, an era of magic existed in our world's dim past. Magic flowed freely, touching every aspect of the lives of men and women of the Namegiver races. It was an age of heroes, an age of fantastical deeds and mythical stories. It was the Age of Legend. As the level of magic rose, so did the danger, luring Horrors from the depths of astral space-nightmare creatures devouring all life in their path. For four centuries, entire nations hid underground as the Horrors devastated their lands, a dark time that became known as the Scourge. A century ago, the people of Barsaive emerged from their sealed kaers and citadels. Trolls, dwarfs, elves, orks, and humans live side by side with exotic races: the lizardlike t'skrang, the small, winged windlings, and the earthen obsidimen. Fantastical creatures dwell once more in the forests and jungles. Arcane energies offer power to those willing to learn the ways of magic. Earthdawn is a fantasy role-playing game set in a world of high adventure, high magic, and terrible danger. The Earthdawn Gamemaster's Guide provides revised game mechanics, extensive setting material, guidelines for creating campaigns in Barsaive, information on creatures, dragons, Horrors, spirits, magical treasures, and much more!

This is a comparative investigation of different regional histories of registration - a feature of societies common across Asia, Europe and the Americas, but poorly understood in contemporary social science. Registration has typically been viewed as coercive, and as a product of the rise of the modern European state. This volume shows that the registration of individuals has taken remarkably similar, and interestingly comparable, forms in very different societies across the world. The volume also suggests that registration has many hitherto neglected benefits for individuals, and that modern states have frequently sought to curtail, or avoid responsibility for, it. The book shows that the close study of practices of registration provides a tool - like class, gender or state - that supports analytical comparisons across time and region, raising a common, limited set of comparative

questions that highlight the differences between the forms of state power and the responsibilities and entitlements of individuals and families.

[Prince Drakulya, Paul Doherty](#) , 2013, 0755395867, 9780755395866. This captivating novel by Paul Doherty traces the life of Prince Drakulya as seen through the eyes of closest friend. Dracula has always been a fascinating yet terrifying figure. Discover him through Rhodros the friend who knew him best. Rhodros accurately describes Drakulya's influences: his harsh imprisonment by the Ottoman Turks, his manipulation by the subtle and brilliant Ottoman court, and his lust for vengeance against the nobles responsible for the deaths of his father and brother. When Drakulya finally breaks free from his captors' influence he returns as ruler of his own country to wreak horrifying revenge...

[Summer of Deliverance: A Memoir of Father and Son, Christopher Dickey](#) , 2010, 1439129592, 9781439129593. Summer of Deliverance is a powerful and moving memoir of anger, love, and reconciliation between a son and his father. Hailed as a literary genius of his generation, James Dickey created his art and lived his life with a ferocious passion. He was a heavy drinker, a destructive husband and father, a poet of grace and sensitivity, and, after the publication and subsequent film of his novel, Deliverance, a wildly popular literary star. Drawing on letters, notebooks, diaries, and his explicit conversations with his father, Christopher Dickey has crafted a superb memoir of the corrosive effects of fame, a moving remembrance of a crisis that united a family, and an inspiring celebration of love between father and son.

Girshick, a sociologist and social justice activist, brings together the voices of sex- and gender-diverse people who speak with absolute candor about their lives. Girshick presents transpeople speaking in their own voices about identity, coming out, passing, sexual orientation, relationship negotiations and the dynamics of attraction, homophobia (including internalized fears), and bullying. She exposes the guilt and the shame that gender police use in their attempts to exert control and points out the many ways transpeople are discriminated against in daily life, from filling out identification documents to gender-segregated bathrooms. By showing us a variety of descriptions of diverse real lives and providing a thorough exploration of the embodied experiences of gender variant people, Girshick demonstrates that there is nothing inherently binary about gender, and that the way each of us experiences our own gender is, in fact, normal and natural.

How will she survive? For Anna, everything takes second place to her burning desire to dance. Even the earthquake that destroyed her Turkish home has not made her think differently, only now she's stuck in a prim suburban household with an uncle who "doesn't approve" of dancing. [Seasonality and Human Mobility Along the Georgia Bight: Proceedings of the Fifth Caldwell Conference, St. Catherines Island, Georgia, May 14-16, 2010, , ISSN 0065-9452, Elizabeth Jean Reitz, Irvy R. Quitmyer](#) , 2012, 0985201606, 9780985201609. Some of the most enduring and fundamental questions in archaeology relate to site seasonality. During which seasons did people occupy coastal archaeological sites? Why is "seasonality" important to our understanding of human behavior? What does this knowledge tell us about life in dynamic estuarine systems? What methods and technologies are available to address key issues of seasonality? Archaeological seasonality is uniquely linked to settlement patterns, resource availability, environmental relationships, anthropogenesis, landscapes, and social complexity. Archaeologists working in coastal settings typically recover multiple biological proxies that are well suited to explicating questions of human seasonal behavior. The Fifth Caldwell Conference was convened to discuss and report on practiced methods for reading the seasonality record found in common biological proxies. These researchers spoke of how they are applying various methods grounded in the natural sciences to estimate seasonality with particular reference to the

archaeology of St. Catherines Island and the Georgia Bight. These methods include stable isotope analysis, 14C dating, longitudinal studies of animals (molluscs and fishes), zooarchaeology, and archaeobotany. The research shows that all plant and animal remains found in a midden contain a record of human behavior. The authors of these 13 chapters agree that multiple indicators of site seasonality provide the most robust picture of the annual settlement cycle. These papers were initially presented at the Fifth Caldwell Conference, cosponsored by the American Museum of Natural History and the St. Catherines Island Foundation, held on St. Catherines Island, Georgia, May 14-16, 2010.

[Experience And Education, John Dewey](#) , 2007, 1416587276, 9781416587279. Experience and Education is the best concise statement on education ever published by John Dewey, the man acknowledged to be the pre-eminent educational theorist of the twentieth century. Written more than two decades after Democracy and Education (Dewey's most comprehensive statement of his position in educational philosophy), this book demonstrates how Dewey reformulated his ideas as a result of his intervening experience with the progressive schools and in the light of the criticisms his theories had received. Analyzing both "traditional" and "progressive" education, Dr. Dewey here insists that neither the old nor the new education is adequate and that each is miseducative because neither of them applies the

principles of a carefully developed philosophy of experience. Many pages of this volume illustrate Dr. Dewey's ideas for a philosophy of experience and its relation to education. He particularly urges that all teachers and educators looking for a new movement in education should think in terms of the deeper and larger issues of education rather than in terms of some divisive "ism" about education, even such an "ism" as "progressivism." His philosophy, here expressed in its most essential, most readable form, predicates an American educational system that respects all sources of experience, on that offers a true learning situation that is both historical and social, both orderly and dynamic.

[Corresponding with Carlos: A Biography of Carlos Kleiber, Charles Barber](#) , 2011, 0810881446, 9780810881440. Carlos Kleiber (1930-2004) was the greatest conductor of his generation. His reputation is legendary, and yet astonishingly, in his five decades on the podium, he conducted only 89 concerts, some 600 opera performances, and produced 12 recordings. How did someone who worked so little compared to his peers achieve so much? Between his relatively small output and well-known aversion to publicity, many came to regard Kleiber as reclusive and remote, bordering on unapproachable. But in 1989 a conducting student at Stanford University wrote him a letter, and an unusual thing occurred: the world-renowned conductor replied. And so began a 15-year correspondence, study, and friendship by mail. Drawing heavily on this decade-and-a-half exchange, *Corresponding with Carlos* is the first English-language biography of Kleiber ever written. Charles Barber offers unique insights into how Kleiber worked based on their long and

detailed correspondence. This biography by one friend of another considers, among other matters, Kleiber's singular aesthetic, his playful and often erudite sense of humor, his reputation for perfectionism, his much-studied baton technique, and the famous concert and opera performances he conducted. Comic and compelling, Corresponding with Carlos explores the great conductor's musical lineage and the contemporary contexts in which he worked. It repudiates myths that inevitably crop up around genius and reflects on Kleiber's contribution to modern musical performance. This biography is ideal for musicians, scholars, and anyone with a special love of the great classical music tradition.

Richardson, Yves Le Bouthillier, Heather McLeod-Kilmurray, Stepan Wood](#) , 2011, 1848449828, 9781848449824. ' . . . the book is rich and unique. It offers very useful analysis of climate law in developing countries and the key issues in the ongoing negotiations. . . an important source of reference.' Environmental Law Review 'The editors of Climate Law and Developing Countries have brought together a star-studded group of authors with often innovative views on how climate

law works (or fails to work) in those countries where it arguably matters more than elsewhere. This volume largely avoids the pitfalls of climate and carbon jargon. It may well succeed in reconnecting the regulatory community to a field of law which has rapidly become the exclusive habitat of banking and finance lawyers. A superb read and reference treasure trove.' Geert van Calster, Katholieke Universiteit Leuven, Belgium 'Global warming is essentially an issue of human rights and justice severely affecting poor countries and indigenous peoples. This book shows why and how climate justice must shape international and domestic climate law. A timely, must-read companion for climate experts and activists, but equally a reminder of how much is left to be learned by negotiators of post-Kyoto agreements.' Klaus Bosselmann, University of Auckland, New Zealand and IUCN Commission on Environmental Law Ethics Specialist Group 'The phenomenon of anthropogenic climate change has become of critical importance to all countries. However, while the majority of developing countries contribute the least to global greenhouse gas emissions, they will generally bear the major burden of the social, environmental and economic impacts of climate change imposed upon them by developed countries. This cutting-edge book contains outstanding contributions by scholars from around the world on the need to expand the range of legal and policy mechanisms and strategies required to bridge the gaps between the north and the south to achieve global climate justice.' Ben Boer, University of Sydney and former Co-director of the IUCN Academy of Environmental Law 'When the IUCN Academy and its partners gathered leading observers of climate law and developing countries they performed a great service. These challenging essays underscore the complexity of mitigation and adaptation issues in the developing world. They guide us past finger-pointing and electric cars towards climate policies reflecting the reality that in their differentiated circumstances, the countries of the North and South only have one planet to care for and not a lot of time to get on with the job.' Jamie Benidickson, University of Ottawa, Canada and former Co-director of the IUCN Academy of Environmental Law This timely book examines the legal and policy challenges in international, regional and national settings, faced by developing countries in mitigating and adapting to climate change. With contributions from over 20 international scholars from developing and developed countries, the book tackles both long-standing concerns and current controversies. It considers the positions of developing countries in the negotiation of a new international legal regime to replace the Kyoto Protocol and canvasses various domestic issues, including implementation of CDM projects, governance of adaptation measures and regulation of the biofuels industry. Through a unique focus on the developing world, this book makes a significant contribution to understanding current challenges and future directions of climate law. It will prove a stimulating read for legal academics, undergraduate and graduate law students as well as policymakers interested in the role of developing countries in climate change law. The book originates from an international conference on Climate Law in Developing Countries Post-2012, co-sponsored by the IUCN Academy of Environmental Law, the University of Ottawa Faculty of Law and Osgoode Hall Law School. The book is part of the ongoing mandate of the IUCN Academy of Environmental Law to generate collaborative research on the most pressing

[Moral Error Theory: History, Critique, Defence, Jonas Olson](#) , 2014, 0198701934, 9780198701934. Jonas Olson presents a critical survey of moral error theory, the view that there are no moral facts and so all moral claims are false. In Part I (History), he explores the historical context of the debate, and discusses the moral error theories of David Hume and of some more or less influential twentieth century philosophers, including Axel Hgerstrm, Bertrand Russell, Ludwig Wittgenstein, and Richard Robinson. He argues that the early cases for moral error theory are suggestive but that they would have been stronger had they included something like J. L. Mackie's arguments that moral properties and facts are metaphysically queer. Part II (Critique) focuses on these arguments. Olson identifies four queerness arguments, concerning supervenience, knowledge, motivation, and irreducible normativity, and goes on to establish that while the first three are not compelling, the fourth has considerable force, especially when combined with debunking explanations of why we tend to believe that there are moral properties and facts when in fact there are none. One conclusion of Part II is that a plausible error theory takes the form of an error theory about irreducible normativity. In Part III (Defence), Olson considers challenges according to which that kind of error theory has problematic ramifications regarding hypothetical reasons, epistemic reasons, and deliberation. He ends his discussion with a consideration of the implications of moral error theory for ordinary moral thought and talk, and for normative theorizing.

[Genomics and Evolution of Microbial Eukaryotes, Debashish Bhattacharya](#) , 2006, 0198569742, 9780198569749.

Genomics and Evolution of Eukaryotic Microbes synthesizes the rapidly emerging fields of eukaryotic diversity and genome evolution. Eukaryotes (cells with nuclei) evolved as microbes and have existed on Earth for approximately two billion years. The tremendous diversity of eukaryotic microbes (protists) is often overlooked by those who study the

macroscopic eukaryotic lineages: plants, animals, and fungi. Yet, eukaryotic microbes are of critical importance to ecosystems, human health, and our desire to understand biodiversity on Earth. By bringing together groundbreaking data from genome studies of diverse eukaryotic microbes, this book elucidates the many novelties among eukaryotic genomes and provides a single resource for otherwise widely dispersed information. Eukaryotic microorganisms impact both our health and our environment. These organisms include some of the deadliest known pathogens such as *Plasmodium falciparum*, a causative agent of malaria, and *Entamoeba histolytica* an agent of dysentery. Eukaryotic microbes also play a significant role in environments through their involvement in global biogeochemical cycles. Such roles are perhaps best exemplified by the coccolithophores, including the species *Emiliana huxleyi*, which can create 'blooms' in the oceans that are visible from outer space (i.e. as large as the state of Alaska). Despite the great importance and breadth of eukaryotic microbes (the vast majority of major eukaryotic lineages are microbial, with plants, animals and fungi representing just three of an estimated 60-200 major lineages), our understanding of their diversity and phylogeny is only now rapidly expanding, in part bolstered by genomic studies. This book presents analyses and interpretations from experts in the field. Recent advances, particularly in DNA sequencing technologies, have made eukaryotic microbes more accessible to genome analyses. Unravelling the wealth of information on eukaryotic genomes will invariably revolutionize our understanding of eukaryotes, including their physiology, systematics, and ecology.

[Suicide in the Middle Ages: Volume 1: The Violent Against Themselves, , Alexander Murray](#) , 2008, 0199553114, 9780199553112. 'Suicide' and 'the Middle Ages' sounds like a contradiction. Was life not too short anyway, and the Church too disapproving, to admit suicide? And how is the historian supposed to find out? In this first volume of his trilogy, Alexander Murray takes the methodological question first, as a key to the testing of all other assumptions. After answering it, he shows that there were indeed suicides, of types and configurations astonishingly modern, if not in numbers per capita. 'The violent against themselves' included rich and poor, townsmen and peasants, men and women, married and unmarried, their motives all too familiar: physical and mental illness, chronic or sudden poverty, arrest, disgrace, heartbreak in love, even what modern doctors might call depression. Following the sources as close to the events as they will lead, the author calls on these fugitives to give an account of themselves. In doing so, they also shed new light on features of their world we thought we all understood.

[Axiomatic Theories of Truth, Volker Halbach](#) , 2011, 1139491814, 9781139491815. At the centre of the traditional discussion of truth is the question of how truth is defined. Recent research, especially with the development of deflationist accounts of truth, has tended to take truth as an undefined primitive notion governed by axioms, while the liar paradox and cognate paradoxes pose problems for certain seemingly natural axioms for truth. In this book, Volker Halbach examines the most important axiomatizations of truth, explores their properties and shows how the logical results impinge on the philosophical topics related to truth. In particular, he shows that the discussion on topics such as deflationism about truth depends on the solution of the paradoxes. His book is an invaluable survey of the logical

background to the philosophical discussion of truth, and will be indispensable reading for any graduate or professional philosopher in theories of truth.

[Mrs. Kennedy and Me, Clint Hill](#) , 2012, 1451648464, 9781451648461. The #1 New York Times bestselling memoir by Clint Hill that Kirkus Reviews called clear and honest prose free from salaciousness and gossip, Jackie Kennedys personal Secret Service agent details his very close relationship with the First Lady during the four years leading up to and following President John F. Kennedys tragic assassination. In those four years, Hill was by Mrs. Kennedys side for some of the happiest moments as well as the darkest. He was there for the birth of John, Jr. on November 25, 1960, as well as for the birth and sudden death of Patrick Bouvier Kennedy on August 8, 1963. Three and a half months later, the unthinkable happened. Forty-seven years after the assassination of President John F. Kennedy, the one vivid image that never leaves Clint Hills mind is that of President Kennedys head lying on Mrs. Kennedys lap in the back seat of the limousine, his eyes fixed, blood splattered all over the back of the car, Mrs. Kennedy, and Hill as well. Sprawled on the trunk of the car as it sped away from Dealey Plaza, Hill clung to the sides of the car, his feet wedged in so his body was as high as possible. Clint Hill jumped on the car too late to save the president, but all he knew after that first shot was that if more shots were coming, the bullets had to hit him instead of the First Lady. Mrs. Kennedys strength, class, and dignity over those tragic four days in November 1963 held the country together. This is the story, told for the first time, of the man who perhaps held her together.

The authors chronicle how millions of Palestinians have been denationalized through the bureaucratic tools of census, population registration, blacklisting and a discriminatory legal framework. They show how identity documents are used by Israel as a means of coercion, extortion, humiliation and informant recruitment. Movement restrictions tied to IDs and population registers threaten Palestinian livelihoods, freedom of movement and access to basic services such as health and education. Unfree in Palestine is a masterful expos of the web of bureaucracy used by Israel to deprive the Palestinians of basic rights and freedoms, and calls for international justice and inclusive security in place of discrimination and division.

Machine Rendering will use interviews and collected artworks to create a thorough presentation of the development of machine rendering as an art form in the West, Japan and China. This book consists of two parts, or two stories. In the first, ten machines created by Western and Japanese artists go into battle. Whether they have cold armour shells and weapons, or they are smooth, humanoid machines, in these battles, they all manifest the rich creativity of the artists behind them. In the second part, ten outstanding Chinese rendering artists will create ordinary everyday life

scenes, using the lives of four family members to present a story of the "mechanised life of the future." Not only will the reader experience a uniquely dramatic clash between fantasy and reality, he will also gain a strong sense of Chinese design elements.

[The Warden of English: The Life of H. W. Fowler, Jenny McMorris](#) , 2003, 0198605250, 9780198605256. '[a] story so poignant, impossible to forget, and exceedingly well told' Simon Winchester, author of *The Surgeon of Crowthorne*, in his Foreword Henry Watson Fowler was born in Tonbridge, Kent, in 1858. This is the first full biography of a man whose *Modern English Usage* has become a classic text known simply as 'Fowler'. It is based on meticulous research from previously unpublished papers, letters, and material from the Oxford University Press archives, and tells the story of his work on *The King's English* and the Concise and Pocket Oxford Dictionaries, as well as on *Modern English Usage*, and of his collaboration on some of these projects with his brother Frank. Against the descriptions of Fowler's work is set the story of a man whose career began as a schoolmaster, but who moved to London to begin a new life as a writer. Jenny McMorris chronicles the life of a fascinating and colourful figure who, amongst other things, found love and married at the age of 50, and despite his advancing years enlisted during World War I. Written to coincide with the 75th anniversary of the publication of Fowler's *Modern English Usage*, this fascinating account of one of the most influential figures in the history of the development of the English language gives an insight into the man behind the scholar.

[Fire and Ink: An Anthology of Social Action Writing, Frances Payne Adler, Debra Busman, Diana Garca](#) , 2009, 0816527938, 9780816527939. *Fire and Ink* is a powerful and impassioned anthology of stories, poems, interviews, and essays that confront some of the most pressing social issues of our day. Designed to inspire and inform, this collection embodies the concepts of breaking silence, bearing witness, resistance, and resilience. Beyond students and teachers, the book will appeal to all readers with a commitment to social justice. *Fire and Ink* brings together, for the first time in one volume, politically engaged writing by poets, fiction writers, and essayists. Including many of our finest writers Martn Espada, Adrienne Rich, June Jordan, Patricia Smith, Gloria Anzalda, Sharon Olds, Arundhati Roy, Sonia Sanchez, Carolyn Forché, Chitra Banerjee Divakaruni, Alice Walker, Linda Hogan, Gary Soto, Kim Blaeser, Minnie Bruce Pratt, Li-Young Lee, and Jimmy Santiago Baca, among others this is an indispensable collection. This groundbreaking anthology marks the emergence of social action writing as a distinct field within creative writing and literature. Featuring never-before-published pieces, as well as reprinted material, *Fire and Ink* is divided into ten sections focused on significant social

issues, including identity, sexuality and gender, the environment, social justice, work, war, and peace. The pieces can often be gripping, such as *Frame*, in which Adrienne Rich confronts government and police brutality, or Chris Abani's *Ode to Joy*, which documents great courage in the face of mortal danger. *Fire and Ink* serves as a wonderful reader for a wide range of courses, from composition and rhetoric classes to courses in ethnic studies, gender studies, American studies, and even political science, by facing a past that was often accompanied by injustice and suffering. But beyond that, this collection teaches us that we all have the power to create a more equitable and just future.

[Claude Cahun: A Sensual Politics of Photography PUBLICATION CANCELLED, Gen Doy](#) , 2007, 1845115503, 9781845115500. "The first full-length title in English on the photographer Claude Cahun whose work was rediscovered in the 1980s, this book looks at Cahun and her oeuvre in the contexts of the turbulent times in which she lived. Surveying standard postmodernist approaches to Cahun, born Lucy Schwob, Doy goes further, positioning her photographs as part of her life as a woman, lesbian and political activist in the early twentieth century. She considers Cahun's relationships with Symbolism and then Surrealism and her approach to dress and masquerade, assessing the images in the context of the situation of women at the time and within the prevailing fashion and beauty culture. She also pays attention to her curious images of constructed objects and re-evaluates the status of her small-scale snapshots as photographs." --Book Jacket.

[A Murder of Quality, John le Carr](#) , 2011, 0141196378, 9780141196374. A murder mystery in the finest tradition of English detective novels, John le Carr's A Murder of Quality is an ingenious puzzle featuring his best-loved character George Smiley, published in Penguin Modern Classics. Stella Rode has twice disturbed the ancient cloisters of Carne School: firstly by being the wrong sort, with her doilies and china ducks, and secondly by being murdered. George Smiley, who has his own connection with the school, is asked by an old Service friend to investigate. Smiley knows that

Stella feared her husband would murder her, but as he probes further beneath Carne's respectable veneer, he uncovers far more than a simple crime of passion. In his second George Smiley novel, le Carr moves outside the world of espionage to reveal the secrets at the heart of another particularly English institution. The result is a pitch-perfect murder mystery, with Smiley as master detective. John le Carr (b. 1931) was educated at the University of Berne and at Lincoln College, Oxford. From 1959 to 1964 he was a member of the British Foreign Service, serving first as Second Secretary in the British Embassy in Bonn and subsequently as Political Consul in Hamburg. He started writing novels in 1961, and has since published twenty-one titles, including *The Spy Who Came in from the Cold* (1963), *Tinker, Tailor, Soldier, Spy* (1974), *The Tailor of Panama* (1996) and *The Constant Gardener* (2001). If you enjoyed *A Murder of Quality*, you might like le Carr's *Call for the Dead*, also available in Penguin Modern Classics. 'Beautifully intelligent, satiric and witty' Daily Telegraph

With grace and humor, it evokes a world in which dwarves and elves burst from legend into life. Meg Christmas, firewatcher in a western sierra, is pulled from the brink of death by strange, small folk who appear at her side as if by magic. When crisis threatens the beings to whom she owes her life, Meg must plumb within for abilities to confront, accept and save a reality previously unsuspected. Part fantasy, part dialogue, part fairy tale for adults, this first book of *The Hidden Lands of Nod* offers a delightful entry into the imagination of Robert Stikmanz.

[That Way Lies Camelot, Janny Wurts](#) , 1997, 0061057789, 9780061057786. Our ancient tradition of tale-spinning is blessed with a treasure trove of truly sacred places. One such place is Camelot. In this superb collection of unforgettable stories, the multitalented artist/writer Janny Wurts, one of today's bestselling fantasy authors, takes the reader to a very special Camelot that is both deeply familiar and delightfully strange. She tells of the Eld Tree that is the link to the fey world, and of the terrible price that must be paid for cutting it; of the elvenkind that emulate the wolf to protect themselves from man; of the horses that rose, and still rise, from the sea. "That Way Lies Camelot" is a book that proves what Wurts' legions of readers already know: that the worlds of fantasy will live on as long as there are writers such as Janny Wurts, with the vision and the skill to bring them to life in the minds of each generation.

[Eat Fat, Lose Fat: Lose weight and feel great with the delicious, science-based coconut diet, Mary Enig, Sally Fallon](#) , 2005, 0141944307, 9780141944302. Since the late 1950's, it's been drilled into us that fat is bad, saturated fat is worse, and tropical fats, like coconut and palm, are just about as near to poison as a food can be. However, a new and unprejudiced look at fat research over the last fifty years indicates that the opposite is true, and that saturated fats, and in particular coconut oil, are the healthiest fats you can eat. This diet will put you back on the track that nature intended for efficient nourishment. This is not a deprivational diet. Let go of the notion that you must suffer to lose weight. Starving yourself is counter-productive, as it signals the body to hold fat. Instead, eating sufficient quantities of the right combinations of fats (as outlined in the recipes and menu plans), you'll notice that you can go for several hours without eating, and without experiencing cravings because the body is satisfied and also has stable blood sugar levels. As a

result, hunger pangs melt away, and eating sensibly becomes easy!

[Fundamental properties of the neutron, IUri Andreevich Aleksandrov](#) , 1992, 0198517351, 9780198517351. The neutron is an elementary particle that has been extensively studied both theoretically and experimentally. This book reviews and analyses the results of the mainly experimental research on the neutron and rationalizes what is known so far about its intrinsic properties. The book covers topics that have not previously been dealt with in detail, including the gravitational properties of the neutron, precise determination of its mass, beta-decay, and its electromagnetic properties. This translation is an updated version of the original Russian text and also covers the more recent advances made during the past 7-8 years, including the application of methods based on the storage of ultra-cold neutrons to the study of beta-decay, new precise measurement of the mass of the neutron, and confirmation of modern theories of the internal structure of the neutron.
