

[Little Soldiers: How Soviet Children Went to War, 1941-1945, Olga Kucherenko](#) , 2011, 0199585555, 9780199585557.

Germany's war against the Soviet Union raised a small army of child soldiers. Thousands of those below the enlistment age served with regular and paramilitary formations, even though they were not formally mobilised or allowed at the front. For several decades after the war, these youngsters played an important part in Soviet remembrance culture, though their true experiences were obscured by the myth of the Great Patriotic War. Situated at the crossroads of social, cultural, and military history, *Little Soldiers* is the first to tell the story of the Soviet Union's child soldiers in a critical and systematic fashion. Focusing on the mechanisms and psychological consequences of propaganda on Soviet children, as well as their combat deployment, Kucherenko adopts a three-tier approach to writing the history of childhood: 'from above', 'from below', and 'from within'. A wide variety of new sources provide insight into young soldiers' combat motivations and the roles they played in the field, as well as their routine experiences and relationship with older comrades. Far from being victims, Soviet child soldiers emerge as independent social actors capable of making choices about their behaviour. *Little Soldiers* interconnects with matters of increasing importance: the role of propaganda in military conflicts, the totalization of warfare, child-soldiering, and social reflexivity.

The reputation of corporate reporting has been in crisis. Trust in the process of financial accounting and auditing has been undermined by a series of high profile scandals involving major corporations, including Enron, Parmalat, Ahold, and Worldcom. In response, regulators and practitioners world-wide have put forward a series of initiatives to repair the damage and restore faith in corporate governance. In this important book, the European Auditing Research Network analyzes how that response has developed in Europe, with particular emphasis on the field of auditing. Leading international academics review how regulation has been revised in specific European countries to help restore confidence in the contribution of auditing to corporate governance. Various themes are explored, including the growing trend of internationalization in regulation, ethics and auditing, professional liability, and professional education. Auditing, Trust and Governance is an invaluable volume for students, researchers and professionals working in the fields of auditing, accountancy and corporate governance, and provides a useful basis for further research on the effects of the increased regulation.

"It's Heart Work: Being The Village That Raises A Child", is a memoir in which "Ms. Evelyn" shares the joys and pains of counseling, mentoring, parenting, and caring for youth impacted by the circumstances of separation from their biological parents. Her experiences and insights will provide a different perspective and understanding of the mind and "heart set" that underlies the sense of indifference, resistance, anger, and/or rejection they may experience from the children/youth they are reaching out to. She, and some of the youth (now adults) she's worked with, share some of the ways in which she was able to make heart connections which helped them to embrace and channel their pain into dreams; as well as the struggles she endured in loving the sons she brought into her heart and her home. Readers will be able to identify, validate, and learn how to take care of their own emotions and well-being, and not lose their minds or selves in holding a positive perception in trying to "be the village" that raises a child and loves them through.

I Get It! I Get It! Is a beautifully-illustrated book about a boy who feels frustrated and not smart. He is having difficulty at school, and at home, and begins to feel overwhelmed. The adults in his life think he is inattentive, and not trying hard enough. Children with Auditory Processing Disorder (APD) find the world a confusing, challenging place. Although they do not have a hearing loss, they often mis-hear and misinterpret directions they receive auditorily. With the support of his family, and his teacher, John learns how to effectively deal with the disorder, for success in school and at home. With modifications and help, John realizes he has a learning problem he can overcome. Colorful, expressive illustrations follow John's journey from confusion to triumph, good self-esteem, and figuring it out. At the end of the story, a Glossary of Terms, Ways You Can Help Your Child at Home and in School, and a Resources List are included.

He draws on the fields of conversation analysis, ethnomethodology, linguistic anthropology and social theory to show how language practices shape--and are shaped by--culture and the law, particularly in the social construction of rape as a legal fact. This analysis examines linguistic strategies from both defense and prosecutorial viewpoints, and how they relate to issues of gender, sexual identity, and power.

important question to ask is who are the victims of these incredible losses? The victims are people who invest their hard earned money in a retirement plan with the hope of someday living the American Dream. Somehow, many of us have been convinced that we are not intelligent enough to invest our own money without the help of Wall Street investors. For this reason, each month we send our hard earned cash to a retirement plan that is normally controlled by Wall Street Investment Advisors. Some disgruntled investors have even marched on Wall Street with picket signs expressing their discontent with the actions of what they call rogue investment Advisors. When asked, many of these investors have said, "similar to the victims of the housing industry meltdown, we are the victims of a fraudulent financial industry in crisis." The first part of the Privileged Information is called "Secrets Revealed." I believe this part of the book will arm the reader with some of the most powerful Financial Secrets that exist today. The second part is entitled the "Privileged Information" because for a very long time this information was only known by a few rich and powerful men. With that said, should you decide to use the detailed knowledge included in the Privileged Information, I am completely convinced that your life will change forever.

[Theories and Narratives: Reflections on the Philosophy of History, , Alex Callinicos](#) , 1995, 0822316455, 9780822316459.

At a time when philosophy of history is decidedly out of fashion, Theories and Narratives explores the relationship between historical writing and theoretical understanding and seeks to establish the legitimate scope of large-scale theories to grasp historical processes as a whole. Pursuing this objective, Alex Callinicos critically confronts a number of leading attempts to reconceptualize the meaning of history, including Francis Fukuyamas rehabilitation of Hegels philosophy of history and the postmodernist efforts of Hayden White and others to deny the existence of a past independent of our representations of it. In these cases philosophical arguments are pursued in tandem with discussions of historical interpretations or, respectively, Stalinism and the Holocaust. Leading theories of historyMarxs and Webersare then examined in the context of recent work by writers such as Michael Mann, W. G. Runciman, and Robert BrennerFinally, the politics of historical theory is explored in a discussion of Marxisms claims to be a universal theory of human progress. Contradicting current fashion, Callinicos rebuts the claims made by many postmodernists that Marxism is inherently Eurocentric in both its conceptual structures and its political practice. Marxs project of human emancipation, he concludes, still define our political horizons.Theories and Narratives will interest all readers for whom the role of history in the understanding of contemporary civilizations is an essential issue.

[Richard Bong: World War II Flying Ace, Pete Barnes](#) , 2009, 0870204343, 9780870204340. Who would have imagined a farm boy from Wisconsin would be the greatest air hero of World War II? Richard Bong was an athletic and hard-working boy from northern Wisconsin who dreamed of flying from the first time a plane buzzed low over his family farm. When war broke out, he left behind a life of sports, deer hunting, and farm chores to fly the new P-38 Lightning for the Army Air Force. Stationed in New Guinea, Bong shot down a total of 40 Japanese flyers in under three years - beating the record of 26 set by Eddie Rickenbacker in World War I. His accomplishments won this modest pilot the title "Ace of Aces" and a Congressional Medal of Honor awarded by General MacArthur himself. Follow Bong as he navigates his way through basic training, flight school, and life on an overseas army base. Watch as he takes to the skies in his P-38 fighter jet, outflying Japanese aircraft with barrel rolls, dives, and turns. Celebrate as he meets and marries the love of his life back home in Wisconsin, and mourn as his life comes to a swift and unexpected end during an ill-fated training flight in California. Richard Bong: World War II Flying Ace is part of the Badger Biographies series for young readers. The engaging narrative is complemented by an accessible format that includes historic photographs, a glossary of terms, sidebars on life in the military, and suggestions for activities and discussion.

[Mercy, Cecil Clarke](#) , 2007, 0954276914, 9780954276911. Mercy is demonstrated by an act of pardon, forgiveness and forbearance. In each case, mercy is experienced and exercised by a person who has another in his power, or under his authority, or from whom no kindness can be claimed. God may show mercy toward human beings, who are ultimately

within His power, even though they may have no direct claim in terms of their behaviour, attitude or actions. A human being may be merciful to another, to whom neither compassion nor forbearance is due, by free act or thought toward that person. From a theological perspective, the characteristics of mercy are rooted in God and are experienced in relation to fellow human beings. This book deals with these matters.

[A Textbook of Family Medicine, Ian R. McWhinney](#) , 1989, 0195050371, 9780195050370. This is a greatly expanded successor to McWhinney's An Introduction to Family Medicine (Oxford, 1978). It includes much new material on the nature of family medicine and on specific clinical problems. There are two new chapters on the experience of illness, suffering, and healing and on doctor-patient communication. The chapter on the philosophical and scientific basis of family medicine has been expanded to do justice to the growing support which the paradigm of family medicine is receiving in the biological, medical, and social science literature. The chapter on clinical method--perhaps the book's core--has a new look and greater depth reflecting work in this area over the past decade. The chapter on prevention provides updated recommendations, and the chapter on the family has been enlarged. The most noticeable change is the addition of five new chapters on common family practice problems. These chapters have a dual purpose: to exemplify the application of principles discussed earlier in the book, and to distill the information on each problem that is most

necessary for family physicians. This is an ideal text for medical students taking a family medicine rotation and for beginning residents in the field.

[The Flag Keeper, Stacy Juba](#) , 2010, 1453753052, 9781453753057. Elizabeth may be a little bear, but she treats the American flag with big respect. Elizabeth wakes up the American flag in the morning and puts it to bed at night. She acts as her father's "flag keeper," helping him with his daily tasks of raising the flag and retiring it for the evening. She soaks up the etiquette facts that Dad teaches her, including don't leave the flag out in the dark without a spotlight. When Dad leaves for a business trip, it frustrates Elizabeth that their flag will be stuck in a boring garage. Every flag she sees reminds her of her job as flag keeper, and Elizabeth grows determined to make her father proud. This patriotic book is designed to teach children about U.S. flag etiquette through an educational fiction story. It includes discussion questions, flag facts, and an activity. The Flag Keeper is ideal for military families, Girl Scout and Boy Scout troops, classroom and library use, and for anyone who wishes to teach a special child about American flag etiquette. It is a perfect complement to patriotic holidays such as Flag Day and the Fourth of July.

(1548-1617) is one of the great anomalies in the history of thought: one thinker functioning in two contrary roles, each reversing the other. The role of being, on the one hand, the consummator of one phase of philosophical speculation, the realist and Scholastic; and, on the other, the initiator (though an unwitting one) of another phase, the idealist, modern, and nihilist. This shift from realism to idealism was crucial in Western philosophy; it inaugurated an era of irrepressible, if chaotic, creativity.

[Translation Changes Everything: Theory and Practice, Lawrence Venuti](#) , 2013, 0415696283, 9780415696289. In Translation Changes Everything leading theorist Lawrence Venuti gathers fourteen of his incisive essays since 2000. The selection sketches the trajectory of his thinking about translation while engaging with the main trends in research and commentary. The issues covered include basic concepts like equivalence, retranslation, and reader reception; sociological topics like the impact of translations in the academy and the global cultural economy; and philosophical problems such as the translators unconscious and translation ethics. Every essay presents case studies that include Venuti's own translation projects, illuminating the connections between theoretical concepts and verbal choices. The texts, drawn from a broad variety of languages, are both humanistic and pragmatic, encompassing such forms as poems and novels, religious and philosophical works, travel guidebooks and advertisements. The discussions all explore practical applications, whether writing, publishing, reviewing, teaching or studying translations. Venuti's aim is to conceive of translation as an interpretive act with far-reaching social effects, at once enabled and constrained by specific cultural situations. This latest chapter in his developing work is essential reading for translators and students of translation alike.

[Almost Anorexic: Is My \(or My Loved One's\) Relationship with Food a Problem?, Jennifer J. Thomas, Jenni Schaefer](#) , 2013, 1616494980, 9781616494988. Millions of men and women struggle with disordered eating. Some stand at the mirror wondering how they can face the day when they look so fat. Other over-exercise, binge, or purge. Many skip meals, go on diet after diet, or cut out entire food groups. Still they are never thin enough. While 1 in 20 adults have experienced full-blown anorexia, at least 1 in 20 has exhibited some of the key symptoms. Many suffer from the effects of anorexia, bulimia, and binge eating disorder, but most never address the issue because they don't fully meet the diagnostic criteria. If this is the case for you, then you may be what we call "almost anorexic." Drawing on the latest research, this groundbreaking book combines a psychologist's clinical experience with a patient's personal recovery story. Almost Anorexic will give you the skills to understand the symptoms of almost anorexia; determine if your (or your loved one's) relationship with food is a problem; gain insight on how to intervene with a loved one; discover scientifically proven strategies to change unhealthy eating patterns; learn when and how to get professional help when it's needed. Jennifer J. Thomas, PhD., is an Assistant Professor of Psychology in the Department of Psychiatry at Harvard medical School, and on staff at Massachusetts General Hospital specializing in eating disorders. Jennifer Schaefer is an internationally known author and speaker whose work has helped change the face of recovery from eating disorders. Her books include Life without Ed and Goodbye Ed, Hello Me. The Almost Effect Series? presents books written by Harvard Medical School faculty and other experts who offer guidance on common behavioral and physical problems falling in the spectrum between normal health and a full-blown medical condition. These are the first publications to help general readers recognize and address these problems.

[Theology of Discontent: The Ideological Foundation of the Islamic Revolution in Iran, Hamid Dabashi](#) , , 1412839726, 9781412839723. Scores of books and articles have been published, addressing one or another aspect of the Islamic Revolution in Iran. Missing from this body of scholarship, however, has been a comprehensive analysis of the intellectual and ideological cornerstones of one of the most dramatic revolutions in our time. In this remarkable volume, Hamid Dabashi brings together, in a sustained and engagingly written narrative, the leading revolutionaries who have shaped the ideological disposition of this cataclysmic event. Dabashi has spent over ten years studying the writings, in their original Persian and Arabic, of the most influential Iranian clerics and thinkers. Examining the revolutionary sentiments and ideas of such figures as Jalal Al-e Ahmad, Ali Shariati, Morteza Motahhari, Sayyad Abolhasan Bani-Sadr, and finally the Ayatollah Khomeini, the work also analyzes the larger historical and theoretical implications of any construction of

"the Islamic Ideology." Carefully located in the social and intellectual context of the four decades preceding the 1979 revolution, *Theology of Discontent* is the definitive treatment of the ideological foundations of the Islamic Revolution, with particular attention to the larger, more enduring ramifications of this revolution for radical Islamic revivalism in the entire Muslim world. This volume will be of interest to Islamicists, Middle East historians and specialists, as well as scholars and students of "liberation theologies," comparative religious revolutions, and mass collective behavior. Bruce Lawrence of Duke University calls this volume "a superb and unprecedented study.... In brilliant figural strokes, he arrays EuroAmerican sociological theory as the crucial backdrop of a deeper understanding of contemporary Iranian history." Hamid Dabashi is professor of Persian studies at Columbia University. He is the author of, among other works, the acclaimed *Authority in Islam: From the Rise of Muhammad to the Establishment of the Umayyads*, issued by Transaction, which won the Association of American Publishers Award for most outstanding professional and scholarly publication in religion and philosophy.
