

Software Development Intern

Position: Development of business software in an agile development team

Start Date: 1.09.2011 or later

Duration: 6-12 months

The Company:

code4business has its roots in the Research Institute for Operations Management (FIR) in Aachen, Germany. With good reputation in business software selection and process reorganization FIR started to ship software solutions from 2005. **code4business** ships business software written in Magento/PHP/Zend-Framework and in C#; especially for ecommerce solutions and Shareholder Relationship Management. We work in an innovative and simple way guiding our activities by the eXtreme Programming principles. Our approach helps the customer figure out the exact features required by the business. Moreover it allows them the flexibility to change their mind during the development.

Tasks:

- Develop business software with PHP/Zend-Framework and C#
- Integrate this software with other Systems
- Become part of the currently formed agile development team

Requirements:

- Solid Computer Science and Programming background
- Good knowledge in Java, C# or PHP
- Good Knowledge in SQL and Databases
- Knowledge in the following topics preferred: ERP-Systems, GUI Design, Web Design
- Good English spoken skills, fair English written skills, German helpful (not needed)

We offer:

- Young team using modern agile processes (eXtreme Programming) and techniques
- Project lead experienced in programming and IT project management
- Responsibility to develop for external customers
- A growing start-up company, spirit and responsibility
