

We urge the County of Sonoma to DENY the proposal for a new gas station, car wash and mini-mart at 5300 Sebastopol Road (Highway 12 and Llano Road), for the following reasons:

- It is completely unnecessary there are already seven gas stations in a five-mile radius
- The proposed site is in the Laguna de Santa Rosa, critical habitat for the endangered California tiger salamander
- The gasoline and diesel fuel will be stored in *above ground* tanks due to risk of groundwater contamination
- There will be impacts from increased traffic and congestion
- We are facing a climate crisis. Sonoma County has taken a lead in trying to reduce greenhouse gas emissions and encourage the use of clean energy. Gas stations are decreasing and sales of electric cars are soaring.
