

# OCTOBER 13 & 14, 2017

## STREAM SCHOOL – PINELANDS PROTOCOL

Participants will be introduced to basic stream ecology, biological monitoring and assessment techniques for streams. Attendees will learn how to collect and identify stream organisms (e.g. bugs) which are key indicators of stream health. Participants will be ready to join existing local volunteer monitoring efforts or even create a new monitoring and outreach program in their watershed. Please dress for the outdoors and be prepared for inclement weather.

### Presenters from the Stroud Water Research center and the NJDEP will introduce:

- Basic Stream ecology and the River Continuum Concept
- Biological Sampling Techniques
- Demonstrations and Hands-on training on Macroinvertebrate Identification and Use of Taxonomic Key
- How to Set Biological Metric for Volunteers
