RADARC AGM 2020 Minutes (17/12/2020)

RADARC Virtual AGM Minutes 17th December 2020

Meeting commenced 8pm

Held using meeting application 'Zoom'.

RADARC Committee

Publicity Tom Fanning – M0LTE

Contests David Honey – M0DHO

Treasurer Barry Scott – M0SQZ

Secretary John Gumb – G4RDC

Chair Simon Watson – M0ZSU

Co-opted members

Training – Ray Brown - G3SCZ

Meetings group/Web Jonathan Sawyer - M0JSX

Web Chloe Monahan - 2E0JPM

Apologies

Jonathan, Ray

Chairman opened the meeting at 20:01 GMT.

Announcement of the very sad passing of Colin Couston G6XSM.

Proposed acceptance of last year's minutes by Vin G4JTR Seconded Graham G3XYX.

Chairman's report.

Simon reminisces about the "before times".

The year started with a visit to the Culham radio club organised by Guy G3ZHL to assist with clearing their premises which they were sadly being forced to vacate. Thanks to RADARC members who assisted with this.

Then "Lockdown 1" happened.

GB3BN nets, then zoom meetings. Zoom has enabled us to have some of our longer distance members join us more regularly. Thanks to Tom M0LTE who is planning how to continue the online aspect of meetings once physical meetings can resume.

We moved club meetings to shortly after 8pm to allow for "clap for carers". Thanks to all NHS workers.

Recognition that everyone has missed the junk sales.

Another bad joke.

Field days have been missed. Different versions of contesting still went ahead.

This year we were going to have a new event for the VHF field day but unfortunately this could not go ahead. Hopefully this will happen in future.

Thanks to Jim G0LHZ for looking after the SCAM mast and diesel generators and more. Custody of these items has been handed over to Nick M0NPK

The McMichael Rally also did not happen - hoping it will go ahead soon. A donation was made to both Reading Rugby Club and Lowland Search and Rescue even though we did not use their services.

The Discord online meeting and collaboration application was a new feature for the club. There has been a lot of interest and many members are participating.

Thanks to the 2020 committee team for keeping things running day to day.

Thanks for website maintenance.

Committee changes:

- Ray G3SCZ is stepping down from training completely following a question from David M0DHO.
- Jonathan M0JSX stepping down.
- David M0DHO stepping down.

Barry M0SQZ encourages people to join committee meetings to find out what committee gets up to.

Simon noted there were 32 participants in the meeting so it is quorate.

Simon also notes:
Santa elfs are isolating.

Treasurer's report

Last year a surplus of £496.08
This year a loss of £776.35

Not using the Woodford Park room and free services has helped. Not having junk sales and the McMichael Rally has not helped.

A few questions regarding accounts answered by Barry M0SQZ regarding insurance.

Training

Thanks to Wally G7FHN for invigilating.

Training was running until lockdown. Ray G3SCZ is stepping down from training. Amateur radio training has changed a lot now so we will be changing with it. We are looking out for members to help with training and maybe even join the committee.

Construction Contest

Radarc constructors contest did go ahead. Thanks to Loz G2DD for running this and to all those who took part. Some really great entries this year.

Secretary's report

A year of two halves - started off as business as usual. Chris Brockley-Blatt was unable to attend a talk but John Holden was able to attend and run a talk. Visitors from rLab (Reading Hackspace) attended. Talks about RAYNET from G4KWT and about broadcast from G4AEH. Makers Bazaar or show and tell went ahead. Last physical meeting from Peter Butcher regarding "The quest for higher frequencies".

The final physical meeting was a difficult one for the committee as we were worried about what was to come.

It was clear we couldn't hold the spring junk sale and we had a huge net for that first meeting. In lockdown.

Committee then worked on video communication options. Committee tried multiple systems. Ideas to combine on air nets with zoom. Google groups email list has become more active. The website blog posting has also been good. Gareth M7GRB setup a discord server - Tom and Chloe worked to build it up to a full server and then get more members online.

Chris Brockley-Blatt was able to do the meeting over zoom. A great supporter of the club too. Hopefully we will get another talk with her soon.

We had some on-air evenings giving members a challenge. We will continue to do more on air evenings.

Stayed in contact with Jim Lee G4AEH who suggested a talk by Laurie G3UML.

We are good as a community to use zoom as our on air procedures work well.

Use of RSGB videos via zoom.

Plan to keep virtual meetings aspect into the future where possible. Lots of remote/sister/local clubs have been getting involved in our meetings and likewise we have been getting involved in theirs.

Clubs are starting to work together more and it is not clear what the future is but this looks set to carry on.

It has been a very challenging year for John as secretary and for RADARC. Thanks to club members for help finding talks. Thanks to Barry for Zoom.

Overview of meetings of this year shows we have been able to adapt and evolve.

Depth of technical experience and knowledge of RADARC members is second to none. This year has been great for developing friendships. Thanks to all members.

Contesting

Has been a disappointing year for obvious reasons in that HF and SSB Field day could not take place and many other activities have been curtailed.

Dave gave an update on scores of RADARC members this year and noted a reasonable level of participation.

There is hope for there to be VHF/HF/SSB field days in 2021

Overall 7th in SSB field day with everyone operating from home or on their own but portable.

Thanks to David for offering to continue contesting work.

Some gear bought - VHF set. FT736 in prep for VHF field day + amp.

Thanks to TVRG for keeping repeaters running.

Thanks for website participation.

Awards

We were unable to present these physically as we were unable to retrieve them from existing holders due to lockdown restrictions. When it is safe to do so, this will be done and the awards engraved as appropriate.

G5KV key award for Services to the club awarded to Nick M0NPK

A1 award for services to the club and for helping other members to Gareth Blades M7GRB

A1 Novice award goes to Brett M7RDG.

First Constructors cup awarded to Simon M0ZSU.

Second Constructors cup awarded to Robin G4IWS

G2FZI Contest cup awarded to Jim G0LHZ

Bingham Shield awarded to Mike G4CDF

Pete Milton Cup for promotion of the hobby and supporting amateurs to Chris G0JTN

Usually that would be the end of the awards but there is one special trophy this year:

RADARC Special Tool 2020 award to Jim Carter G0LHZ for much help over the years with Field days and producing the special tool very expertly. Beer also included.

Another bad joke

Stand down of Committee - Handover to Vin G4JTR to commence proceedings

Simon Watson for post of chairman - Des G8FIF Proposed - Brett M7RDG Seconded
John Gumb for post of Secretary - Loz G2DD Proposed - Jim G0LHZ Seconded

Barry Scott for post of Chairman - Graham G3XYX Proposed - Bill G4WJS Seconded

Dave Honey standing down after a brilliant 16 years of service. Continuing with contest management until a new member is found. No nominations from the floor.

Tom Fanning for post of Publicity - Bill G4WJS Proposed - Chloe 2E0JPM Seconded

Jonathan Sawyer and Ray Brown resigning as co-opted members.

Chloe to stay as a co-opted member.

Well done and thanks from Vin and other members to the committee.

Simon - Thanks to all of the members for getting involved.

Discussion

Donations:

- £150 TVRG approved.
- £100 RCF approved.

Provisional booking for the McMichael Rally for 11th July 2021.

Membership fees:

- Membership fees are to stay the same.
- Payment methods for membership fees:
 - No PayPal
 - No cheques.
 - Card and bank transfer accepted.
 - "Square" for card payment

AOB

G4CCC - thanks from TVRG for continued support from RADARC.

G3XYX - thanks G4CCC for the TVRG services. G3XYX thanks everyone.

Meeting closed at 9:30pm with another bad joke from Simon and thanks to everyone.

2. Chairman's Report

The **2021 RADARC committee** was as follows -

Chair Simon Watson – M0ZSU

Secretary John Gumb – G4RDC

Treasurer Barry Scott – M0SQZ

Ordinary committee members

Publicity Tom Fanning - M0LTE

Co-opted members

Web Chloe Monahan - 2E0JPM

At the end of 2020 we were confronted with the sad news that Andy Levy M5ALG had gone silent key. Andy was instrumental in the running of the McMichael rally for over 15 years and was a cheerful and friendly character. He enjoyed contesting and helped out with the Christian Aid Walk. He will be missed and our condolences go to Maureen M3AGI and family.

On the 14th January our first talk of 2021 was held, online of course due to the continuing situation with Covid19. Despite that it was very well attended, and it was great to hear what everyone had been up to over Christmas. Michael Meerman M0MPM also treated us to a live demo of his excellent QSL card system. I had the feeling everyone was happy to have a good old chat and socialise albeit virtually. We continued the mode of informal Zoom meets in early February and then Mike Naylor G4CDF kindly did a talk on EMF/EMC which was informative and produced much lively discussion as you can imagine. On the 25th we had a more formal talk in the style we are used to but still via Zoom from the Royal Navy which was interesting. Thanks to the great work of club secretary John Gumb G4RDC and those who helpfully provide him with contacts, many of the talks from this point on were from very interesting presentations, such as SOTA later in March.

Although we were hoping earlier in the year that the McMichael rally would go ahead in 2021, it became clear by later in the summer that it would have to be cancelled again. While small social gatherings were permitted in a socially distanced way, large gatherings were still a no.

However on the 24th June, thank fully we had a physical outdoor meet at the Rugby Club again. It was really great to see people in person again. This became the mode for the summer months, and great fun was had, antennas tuned and junk exchanged. Graham G3XYX and Harry G3NGX brought along a healthy amount of junk and great fun was had rummaging.

Also in June, Denis G4KWT and Graham G3XYX started on an amazing job getting a new outdoor PA system installed at the Rugby club. This was soon up and running with good clear sound all over the fields. The Rugby Club are very pleased with it and use it regularly and it will make setup for the McMichael rally simpler. Thanks both for the excellent work.

Over the summer outdoor meetings were enjoyed.

In September we welcomed the return of the possibility to physically attend the SSB Field day at Sonning farm. As always it was an enjoyable event, and we did well in the contest too (see contest section)

Around this time we also managed to sort out more of the junk previously collected from the Culham Radio club, ready for the junk sale.

In the beginning of September, we decided to run a 'Junk Festival' outside at the Rugby Club. This was really just a usual junk sale, but held outside. It was held on a Saturday morning to make the best of the daylight and not use up a talk slot. The weather was kind and it was lovely to see members there, it had quite a good social atmosphere a bit like a mini rally which was helped by the availability of bacon rolls and beer!

Thanks must go to the auctioneers (Vin G4JTR, James and Chris G0JTN) for the usual entertaining and efficient auction. Also Denis G4KWT and Graham G3XYX for providing sound not phased (I'm sure there is an audio joke there!) by the outdoor location, lastly to all those who came along with junk and money! This auction made around £300 for the club.

Later in September, as the rules now allowed, we began holding 'hybrid' meetings. The physical part at the 2nd Woodley Scout Hut and on Zoom virtually. In this way we avoided forcing those not comfortable with indoor meetings to attend and kept some advantages like distant members still being able to join in. This seemed to work well, largely thanks to the technical abilities of Denis G4KWT and Tom M0LTE. This was the first (deferred by Covid) test of the new location at Vauxhall Drive. The main advantage being no pole in the middle of the room and no hard 'you must leave now' time. Indeed we now have keys to the venue so can arrive early and leave a bit late sometimes within reason if there is a lot to tidy up. Going forward I hope that we can store some low value equipment there, and even set up some antennas that can be quickly connected up. We also have broadband internet connection at this venue which helps with the Zoom element of the meeting. The tea urn was missing from this location which was quickly rectified by purchasing a RADARC one.

Another great new thing which came out of having to social distance is the realisation that Speakers do not always have to physically attend opening up opportunities for talks from America like the one from American SDR manufacturer FlexRadio which would have almost certainly never happened otherwise.

As it was so popular last time, we ran another junk sale in November, this time inside at the Scout Hut, Woodley as the risk of cold or wet weather was too high to make the Rugby Club feasible.

Again, thanks to our auctioneers, this time with Jim G0LHZ and James Hopper G8XML.

It was another success and we raised another approximately £275 for the club, the total for the two junk sales being £623.25.

We enjoyed some more hybrid meetings at the club heading on through into winter.

This year the club held two events to allow local scout groups to build radio kits, the first of which with the ability to try some Morse or have an HF QSO. This year we are using FM radio kits which pick up lots of loud stations with a short wire antenna, this seemed to go well. Thanks to David Honey M0DHO, Ray Brown G3SCZ and Guy Carter 2E0GDC. We look forward to running more events like this next year.

As I write now things are sadly far from certain on the Covid front, but lets hope things will again improve as we move forward into Spring next year. The club has now lots of different styles of meeting and there are many different ways to enjoy each other's company and work on projects together.

Thanks go to the committee members for all their behind the scenes work, keeping things working and moving forward.

I would also like to thank members for joining in with the various events as after all, it is you which make it all happen.

The committee works well but is now quite small, so if you can help in any way you will be very welcome.

Having almost finished writing, we found ourselves confronted with the very sad news of Bill Somerville G4WJS passing away on the 3rd December 2021.

Not only was he a very active member of the club, he was also amongst other things very active with the design and maintenance of the WSJT-X system (as you probably already know), helping and supporting people worldwide for free.

He was a regular attendee of the club Zoom meetings and provided much helpful information, and had a great character. He had helped and inspired many including myself, and I have read from so many different sources about his patience and helpfulness with others.

He will be very much missed, our condolences to all who had the pleasure of knowing him.

One of our membership pointed out one of the last pictures Bill had posted on our online forum (birds perching on this antenna system) which I include here.

Rest in peace Bill.

73

Simon MOZSU RADARC

Membership

Membership continues to be excellent with a total of 91 members by late 2021, a slight increase since last year.

RADARC Finance

Item	2021	2020
Expenses	2356.32	2807.90
Income	2515.63	2031.55
Surplus	159.31	-776.35
Total funds held	13238.58	13062.07

The treasurer's financial report is attached, which indicates club finances all in order. A big thank you must go to Barry MOSQZ who runs the club accounts very efficiently.

McMichael Rally

Sadly we were again unable to run the rally this year, but fingers crossed for 17th July 2022.

The Training Courses.

We haven't resumed any training courses yet, but do offer mentoring , advice and help with those wishing to study online.

Construction contests

Loz James G2DD again did a wonderful job of running the contest (this time a Hybrid meeting) which we are thankful for. There was only 3 entries this year, but they were all very high quality.

Contesting

Thanks to David M0DHO who coordinates this activity in the club. Please see the report from David later in the report.

RADARC Net, News net

The Reading Area 4 Metre Net, held on Tuesday evenings on 70.425MHz FM at 20.30 local time continues to run. If you have not tried this net it is highly recommended and you would be very welcome, again most participants if not all are RADARC members.

Although not a technically club net, usually most if not all of the participants of the after news net (at around 9:25am Sunday mornings after the RSGB news reading at 9am) are RADARC members. The news can be heard on 6m, 4m, 70cm, 3cm and streamed internet video due to the continued amazing work of Dr.Alison Johnston G8ROG, also a RADARC member. Thanks go to Alison for continuing to provide this work despite being busy with her church duties as well.

There is also usually a Thursday night net on RD with RADARC members, when we are doing the committee meeting.

RADARC Web Site

The club site continues to work reliably and the club also hosts the QSL card system created by Michael Meerman M0MPM. Looking forward we hope to record more club events on the blog pages.

Club Shack

We are hoping to at least be able to store some low value equipment at the Scout Hut, and perhaps install an antenna system which can easily be connected on a club evening etc.

Club Equipment

The club has a varied and useful library of equipment, most of which can be loaned to members.

This year this has not been used much due to Covid 19.

The club has purchased a metal large trailer box which will be used to store all the equipment related to the Scam mast and generator for club events together.

Other club activities

There is always other club activities which I am not involved with myself but would like to acknowledge where I know a lot of RADARC members team up with Raynet and help support. This is excellent work which illustrates how radio is a very practical tool as well as a bit of fun.

It has been another strange year, although we were able to see each other a bit and run some great club activities like the junk sales, the threat of the virus still lurks and there is always extra care to be taken. Indeed, we have had to put our AGM back into the virtual world this year.

Through all this the spirit of amateur radio allows us to still keep in touch and enjoy each other's company, join in with joint projects and just have some fun. I know it goes along way to keep feelings of isolation at bay.

So once again, thank you very much for being part of the club, and I hope you have enjoyed it.

Good DX and 73s

Simon Watson M0ZSU, Chairman

4. Treasurers Report

See appendix 2, as separate pdf attachment from Barry Scott, M0SQZ

5. Secretary's Report

By John Gumb G4RDC

Introduction

RADARC's signature qualities shone through again this year: the ability to adapt, innovate and change quickly. We started the year with significant Covid-19 restrictions which necessarily meant virtual meetings. Building on the experience of 2020, software applications "zoom" and "discord" helped people to interact in addition to the usual local RF nets and email discussions.

As restrictions eased during the summer, the importance of being able to meet each other again was clearly evident at the first 'Rugby Club' (RRFC) meetings. We tried to do as many as possible.

Finding a new home?

RRFC is a great venue, not least because it has a bar. But for more formal presentations, although it is possible to hold meetings there, it is somewhat restricted.

Building on the 2019 AGM venue, the 2nd Woodley scout hut has acquitted itself well for meetings during the latter part of the year. Whilst Woodford Park was certainly functional as a venue, there were significant drawbacks from the perspective of organising talks (increasingly restricted access times, noisy zoomba classes and a pillar in the middle of the room).

Junk Sales

Necessarily, the junk sales had to happen a little differently this year. The first junk sale was at RRFC in September (outdoors). The PA work at RRFC by our sound crew (Denis, Graham) primarily intended for RRFC use and the McMichael Rally came in very useful. The second was at the scout hut in November. Both events worked very well.

"Hybrid Meetings"

Thanks to the magic of Tom M0LTE and Denis G4KWT, we now have "Hybrid" meetings where people are able to meet in person and meet virtually simultaneously.

Finding our way in the new virtual world

Perhaps in order for RADARC to grow, we need to consider opening at least some of our meetings up to a wider audience. Many thanks go to Newbury and District ARC for allowing us to participate in many of their meetings and conversely I hope they have enjoyed attending a number of ours.

Looking forward to 2022

The usual mix of activities will drive our club meetings and activities:

- Construction evenings
- Guest speakers
- Open zoom chat sessions
- Videos

- ad-hoc Junk Sales
- Field Days and Contests
- Construction Contest
- zoom chats
- Discord

I expect this list to grow thus building and strengthening the RADARC community. Already there are signs we may be able to work with the local astronomy group (thanks to Mike G4CDF for liaising here).

Making Meetings Happen

Thanks to all who helped out here. This ranges from ideas and suggestions to arranging or running entire meetings. The “Togo DxPedition Story” thanks to Michael M0MPM is one fine example. Besides being a thoroughly entertaining and informative evening, it told the story of how RADARC was key to the success of the FT8 digimode aspects of the DxPedition.

It is important for RADARC to have a few members willing to do talks/presentations etc. to other clubs as these are useful bargaining chips when speakers from other clubs kindly offer to provide talks for us. I am continually astounded by the generosity of our guest speakers.

The more we can involve everyone in helping out on the meetings front, the more vibrant and varied our events will be. Being able to spread the knowledge/load of organising meetings puts the club in a much stronger position. Please let me know if you are interested in learning more!

Capturing what we've done

One space where we are perhaps lacking is capturing the activities on our website/blog and other social media. If anyone is able to help out here, I think it would make a big difference. I am very much focussed on forward planning with meetings. I think we need someone/a team looking back. This would most likely provide new ideas for future meetings too.

Meetings Summary

The ‘EMF’ discussions with regard to the new license requirements were lively and productive. Many thanks particularly to Mike G4CDF working with John Rogers M0JAV at the RSGB for leading things here with energy levels which would definitely not be within OFCOM limits!

All meetings are via zoom unless otherwise stated.

14 th January	Zoom chat	Great mix of “war stories” with contributions from Chris G0JTN, Jim G0LHZ and many others. Lots of things catching fire.
28 th January	HF Amplifier project; zoom chat	Simon M0ZSU and Robert Brown http://www.m0rzf.co.uk/20W_Amplifier/
11 th February	"Technical aspects of Meeting Ofcom Requirements for field strength limits"	Mike G4CDF and John Rogers M0JAV
25 th February	An evening with the Royal Navy	
11 th March	SOTA	Rob Chipperfield M0VFC
25 th March	Togo DxPedition Story	Daniel Eberli HB9EHD thanks to Michael M0MPM
8 th April	RSGB Convention Video: “Why Radio and Weather Go Together”	
22 nd April	Search and Rescue Maritime Radio in the British Isles by Carl G0KPE	Carl G0KPE thanks to Chris G4CCC
13 th May	Boeing 737 Max story	Andrew Derbyshire thanks to Ian Hill G8MWK
24 th May	Royal Navy W/T Portables 1900-1947	Clive Kidd G3YTQ HMS Collingwood Heritage Collection
10 th June	“Show and Tell” evening	
24 th June	Reading Rugby Football Club (RRFC)	First “physical” meeting after the relaxing of lockdown restrictions
8 th July	RRFC - “green’ radios (i.e. military)	
15 th July	RRFC – SDR demo	Due to popularity of RRFC meetings – an extra meeting ad-

		ded here
22 nd July	Transceiver Performance for the HF Contest and Dx Operator	Rob Sherwood, NC0B
12 th August	RRFC – meteor scatter, antennas evening	
26 th August	RRFC	
9 th September	Top Secret: From Ciphers to Cyber Security	Dr. Liz Bruton
11 th September	Junk Sale	RRFC
23 rd September	BHI Noise Cancelling with Graham Somerville	Our first “Hybrid” meeting
14 th October	“Notes from a Small Station”	Joe Chester M1MWD Our first “in person speaker”. Hybrid meeting, Scout Hut
28 th October	FlexRadio - SDR	Michael Walker VA3MW
6 th November	Junk Sale	Scout Hut
11 th November	Construction Contest	Hybrid meeting, Scout Hut
25 th November	British Antarctic Survey	Michael Gloistein GM0HCQ Hybrid meeting, Scout Hut
9 th December	AGM	Hybrid meeting, Scout Hut

6. Training Report

No specific training ran this year, but online mentoring and assistance seems to be going well.

7. Contest report

RADARC Contest Report 2021

MODHO David Honey

We didn't take part in NFD.

We did take part in SSB field day and came 2nd in the lower power unassisted portable section. Details can be found at

<https://www.rsgbcc.org/cgi-bin/hfresults.pl?Contest=SSB%20Field%20Day&year=2021>.

We got a certificate (attached and saved in dropbox). It's worth noting that there's a huge gap between G4FNL/P in 1st place with 287,796 points and G3ULT/P (us) in 2nd place with 104,742 points.

For the RSGB club championships, RADARC came 22nd in the Local Club section. This is a considerably poorer result than previous years and seems to reflect the lack of interest in contesting across the RADARC membership which has been waning over recent years. Only 5 members took part in any of the legs. Winner of the club ladder was Jim GOLHZ.

RADIO SOCIETY
of
GREAT BRITAIN

This is to certify that

Reading & DARC G3ULT/P

MODHO M0NPK G4RDC G4AAO M0ZSU G0LHZ

**2nd place in the Low Power Unassisted Portable Section
of the**

SSB Field Day 2021

Stewart Bryant

President of the RSGB

Stewart Bryant, G3YSX

8. McMichael Rally 2021

Again, sadly cancelled this year.

We are very much hoping next year a rally will be possible on the 17th July 2022.

9. Awards and Trophies

- 1. G5KV Award** Morse Key For significant services to RADARC This is the premier RADARC (commemorates Bill Leonard G5KV) Award.
- 2. A1 Award** Shield To any member for commitment
Presented by J. Linford to the club or an achievement, eg
G3WGV 1993 winning a contest, gaining full Licence, Outstanding Club Talk.
- 3. A1 Novice Award** Shield To a young or novice member for
Presented by J. Linford achievement,
G3WGV 1993
- 4. Constructors Cup** Cup To the winner of the construction
Presented by Peter Smith contest.
G4JNU 2006 (Larger)
- 5. Constructors Cup** Cup To the runner-up of the Presented by Peter Smith construction contest.
G4JNU 2000 (Smaller)
- 6. Fox Hunt Cup** Cup 2m DF. Not currently awarded.
- 7. G2FZI Cup**, (1964) Cup Highest contest scorer of the year.
- 8. Bingham Shield** shield To a member, services to the Club.
- 9. The G3AKF Shield** (2009) shield For Morse Code Achievement
Award in Memory of Bryan Taylor, G3AKF
- 10. The Pete Milton Cup** (2016) For either outstanding achievement in helping someone in a specific area of Amateur Radio, or help and encouragement to people new to Amateur Radio
