

## FRONT-END DEVELOPER

TreeHouse's long-term success and innovation in the Home Improvement marketplace are contingent on high caliber team members. We are looking for ambitious, optimistic development talent to help re-invent our digital presence. A person with an empathetic design sensibility and combined with a knack for turning that sensibility into tangible web experience for our customers, salespeople, and construction project managers is must for the role of Front-end Developer.

A Front-end Developer at TreeHouse is a critical member of our growing digital team. This person will be challenged initially to create quick prototypes that can be tested by internal users and customers alike and eventually to deliver clean, functional online experience incorporating best in class responsive design and streamlined user experience. The Front-End developer will be a critical team member in our cross-disciplinary design team

### The Ideal Candidate:

- Deeply believes in the mission and values of TreeHouse to build a smarter and healthier planet in our homes
- Is a team player who can be flexible and adaptable in a growing start-up environment
- You are extremely good at getting stuff done – always on top of your A game
- Is both an artist and an engineer when it comes to front-end development
- Embraces and thrives in high paced, lean startup cultures – everyone wears multiple hats

### Key Responsibilities:

- Work with an awesome design team to develop new to the world internal mobile-first tools and customer-facing web assets
- Solve technical problems that few have solved before – no one is disrupting the Home Improvement landscape like we are!
- Bring your passion for front-end development to the TreeHouse organization and help define how the industry interacts with our brand
- Have a direct impact on the company's top line performance

### What you would need for this job:

- 3+ years of relevant experience
- Strong knowledge of and working experience with:
  - HTML5
  - JavaScript
  - CSS
  - SASS / LESS / Stylus
  - React
  - Browserify / Webpack
  - Gulp / Grunt
- Prior experience developing responsive web sites and / or applications
- Experience developing rapid prototypes to assist UX design process

- ❑ Working experience with an agile design and development process
- ❑ Experience with node.js a plus

**Compensation:**

Proportional to past experience
