About You

- Self-starting problem solver that excels in team environments
- Enjoys varied projects
- Excited about the ability to shape best practices and mentor team members

About Us - OnPrem and the Innovation and Development Center (IDC)

OnPrem Solution Partners is a consulting and technology firm. We help Hollywood come into the digital age by automating their content management and content delivery from photo shoots to movie theaters, as well as consumer facing sites like iTunes, Hulu and Netflix.

Our consultants work on-site with clients in LA and NYC, with our Engineers working on-site in Austin, Texas at the Innovation Development Center(IDC). At the IDC we build custom software applications that support our clients needs and business objectives. Our highly collaborative team works in an agile environment with direct access to our clients and partners.

Job Summary

We're expanding our Engineering team and we're seeking an innovative Sr. Front End Engineer to join us in Austin. You'd work directly with leadership to contribute to the creation of engineering policies, assist in estimating technical projects, be an active part in the design and development of software, present solutions to clients as well as OnPrem team members, and shape the kind of technologies that we are going to be using.

Join us (Requirements)

- At least 6 years in software development
- Demonstrated proficiency in gathering product requirements from both technical and nontechnical customers and translating those requirements into fully-baked product plans with development timelines and cost estimations
- Experience with the following:
  - Leading development teams
  - Agile methodologies
  - HTML5, CSS3, and Javascript
  - Front-end MVC framework such as Angular or Backbone
  - Front-end build system such as Gulp or Grunt
  - Front-end testing units such as Mocha or Jasmine
  - Implementing custom solutions and building plugins for enterprise applications
  - Deploying and leveraging software development best practices e.g. style guides, code policies, and code reviews.
  - Domain driven design and design patterns

- ○ Implementing and leveraging Atlassian tool suite (or like tool suite) for defect management, issues management, code check-in and deployment, and collaboration
  - ■ AKA JIRA, Confluence, HipChat, and BitBucket
- ○ Working on full-stack development teams comprising of backend, design, and Q/A resources/individuals/team members/whatever

Preferred

We're looking for people with Exceptional technological curiosity.
A BA/BS is preferred.
