

Fabricator Job Opportunity

The Public Works (thepublicworks.biz) is a Denver, Colorado based design, fabrication, and multimedia marketing firm that specializes in crafting an authentic presence for local, national and global brands. We believe in a work hard, play hard mentality and pride ourselves in creating a positive, creative and enthusiastic work environment.

We are currently seeking full-time, experienced and talented fabricators that are well-rounded both in and out of the workplace. Above all, applicants must have a positive attitude with an emphasis on self-motivation and personal growth. An ideal candidate is comfortable with completing jobs from start to finish either on their own or in a team environment. Attention to detail is imperative as well as being able to communicate ideas within a team. We take pride in our ability to think outside the box and look for candidates capable of the same.

While we are seeking independent contractors with certain skill sets, we expect everyone on our team to participate in a wide range of tasks that can vary from prototyping to production work, including routine machine maintenance. Occasional travel may be required as well.

We are specifically looking for a candidate with advanced skills in either woodworking, metal fabrication or both. You should be comfortable in a professional shop environment and able to work on a wide variety of tools and machines.

All skills may not apply to you, but we are looking for a majority of the following:

- Strong written and verbal communication
- Exceptional work ethic and a self-starter mentality
- Comfortable with producing work as per plan
- Basic computer knowledge
- MIG and/or TIG welding
- Metal cutting, drilling and grinding (drill press, surface sander, plasma cutter, bandsaw, etc)
- Furniture joinery and familiarity with woodworking machinery (table saw, router, planer, jointer, etc)
- Knowledge of finishes and painting
- Bonus for experience with automated machinery such as CNC tables, Bridgeport mill, and lasers
- Experience with a wide range of architectural materials
- Experience or familiarity with Solidworks is a plus
- Available to work daily from 9am until 5pm and perhaps infrequent weekends

Willing to train the right individual. Pay depending on experience.

Please submit your resume to: scott@thepublicworks.biz
