

Memorado – Brain Games

**Strong brain.
Strong life.**

Combining games and learning!

Here is your chance to work on a product that significantly improves people's quality of life around the world. Memorado is your leading mobile gym for the brain. We started 1 year ago, have attracted \$5M in funding and are growing rapidly around the world, having attracted 3.5 million members in 12 months.

Backend / Ruby-on-Rails Developer at Memorado

About the product:

- Our gym for the brain trains your memory, concentration, and logic skills through serious games that are based on neuroscience research
- Currently available on iPhone, iPad, Apple Watch and on the web; Android coming soon
- Available in 26 languages and used in all countries of the world except Western Sahara
- Global review average of 4.7 stars in the app store
- Featured as Apple's Editor's Choice around the world

Your role:

- You will completely own and be responsible for the API to our mobile clients
- You will structure the backend data to use it for powerful BI reports
- You will work on improving the user experience and delivering a quality product

Your profile:

- You have 3+ years of experience in Ruby-on-Rails
- You are comfortable working with Git
- You have a structured, proactive working style
- Desired: experience with test-driven development
- Desired: experience with CSS and HAML

Sounds interesting?

Please submit your application including CV to jobs@memorado.com.

Based in Berlin, you will be part of our small but excellent international team (no German required) and shape the success of our venture. We are on a strong growth path, so don't miss the chance. Regular personal development sessions, awesome team events, and a feeling that you change people's lives all day long complete our offer and will enrich your days as part of our fantastic team.
