THRED**UP**

Ruby on Rails Engineer Internship

At thredUP, we're revolutionizing the clothing industry and we're looking for hungry engineers to help us drive the product forward. This role is full-stack, which means you'll be expected to work on the back-end (Rails) and front-end (NodeJS, React & Flux, HAML/SASS/CoffeeScript). If you want to be a part of an engineering team that cares a lot of about each other, our team's culture, our codebase, and building a successful company, we'd love to hear from you.

Program Details

- 3 month term for summers and 6+ month term for co-op
- Full-time offer possible for after graduation (including Visa sponsorship when applicable)
- This is a paid internship. Compensation varies depending on skill and experience.

What You'll Learn

- Agile development methodologies.
- Ruby/Rails + unit/integration testing (RSpec/Capybara).
- MySQL + caching techniques (Memcache/Redis)
- Git/GitHub & Deploying production applications on AWS.
- A/B testing & Front-end performance optimization.

What We Care About

- Pushing code that's well tested and improves the overall quality of the codebase.
- Being open to pairing, knowledge transfer, and teaching other engineers.
- Wanting to improve our processes and engineering culture.

What We Offer

- A mentor to help you ramp up and help guide your learning.
- Computer of your choosing + Apple LED Cinema display to use.
- Work from home Wednesdays.
- Stocked fridge + snack cabinets.
- Office located in downtown San Francisco.

To apply, please email dan@thredup.com with your contact information.
