Airport Blvd. Force Main and Carolan Ave. Utility Improvements City Project No. 83670

As a part of the City's Sewer Master Plan, the Airport Boulevard Force Main will be included in the upcoming sewer system improvement.

The City has retained Hatch Mott MacDonald for the design and construction management for the project. The construction contract was awarded to K. J. Woods Construction, Inc., the primary contractor for this project. Construction is estimated to start in March 2015 and to finish in July 2015. Work at each location of the project is estimated to last between two to four weeks. The exact time of the construction schedule at your location will depend on the Contractor's progress schedule. You will be notified one week ahead of the construction for the work in your area. There will be no-parking signs posted at least 48 hours ahead of construction. You will also get construction updates during the project if there is change of schedule.

Construction hours are from 7:00 a.m. to 7:00 p.m., Monday through Friday. During construction hours a portion of the roadway maybe closed. In some cases the entire street maybe closed to through traffic. There will be workers, construction equipment, vehicles and materials on the street or sidewalk during the construction. The contractor will use flagmen or use detour signs to direct the vehicular traffic. There may be possible delays for residents to access property driveways. The Contractor will temporarily place metal plates over open trenches to provide access if needed. We will do our best to minimize any disruption caused by the construction. Field Inspectors will be present on the job site and will be happy to answer your questions or provide assistance if needed.

If you cannot locate an inspector during the construction, or have any questions regarding the project, please contact our project hotline at (650) 703-5586. Your patience during the construction is greatly appreciated.
