SMI-Lab 15 Plugfest #3

SNIA™
Storage Management Initiative

On **May 18-21, 2015,** NetApp hosted the third SMI-Lab plugfest of the year at their facility in Sunnyvale, California. Chris Lionetti, Reference Architect at NetApp and Treasurer of the Storage Management Initiative, helped with arrangements. Jim Davis, WS, once again led the plugfest

Attendees in Sunnyvale

> **SMI-Lab Meetings**
> *Jim Davis leads SMI-Lab 15*
> *Weekly Technical calls*
> **Wednesdays 10:00 AM Pacific**

Karl Schopmeyer, Inova Development, updated all attendees on Open Pegasus and consulted with those who wanted advice and help with troubleshooting.

Thank you for hosting, NetApp!

Hosting a Plugfest...

NetApp hosted this plugfest at their headquarters in Sunnyvale, California. They provided the infrastructure and lab rooms for plugfest attendees to access the work rooms throughout the four-day event.

The SMI-Lab ran like any other plugfest, the only difference was the location. NetApp prepared a conference room and workbenches that would hold up to 50 people. VPN to SNIA's Tech Center was available on the NetApp network to facilitate access to equipment in Colorado Springs.

Chris Lionetti, NetApp, provided attendees with nformation on restaurants and transportation. NetApp provided breakfast and lunch, and—as it traditionally does—SNIA hosted a team-building dinner at a local restaurant.

Nimble Storage reports...

Khushboo Sancheti, Nimble Storage, reported on her team's accomplishments: "We worked with Karl Schopmeyer to get code working with Pegasus V2.13; we identified issues and were able to fix them. We also had great discussions with Microsoft regarding Indications."

Plan ahead...

2015 Plugfests:
- August 3-6
- October 5-8
- December 7–10

Next plugfest...

SMI-Lab 15 Plugfest #4
August 3-6, 2015
SNIA Tech Center, Colorado Springs
