Who We Are

Founded in 2006, zAgile is the pioneer in cross-system applications, products which integrate heterogeneous tools and applications, connect inter-departmental processes, and unify information access of disparate sources. The key objectives are to improve collaboration between teams, optimize business processes, and unify information for key business decisions. zAgile's hundreds of customers range from midsize to enterprises including Snowflake, TIBCO, Informatica, Talend, Lucid Motors, and Walmart.

Why Work at zAgile?

zAgile has the attributes, opportunity, and benefits that top talents seek.

- **Established success** with hundreds of customers.
- **Leading-edge technologies:** zAgile's solutions apply a variety of innovative technologies including:
    - Leading application ecosystems: Salesforce, Atlassian

- ○ Cloud application connectors
- ○ Big data and analytics
- ○ Search engines
- ○ Semantic technologies for application integration
- ○ PaaS platforms (Heroku, Kubernetes, Google Cloud, Docker, etc.)
- ○ Future in AI, Machine Learning, Search, Integrations
- **Serving a broad range of industries:** Technology, Banking, Retail, Healthcare, and more.

Our Values and What We Offer

- Friendly and team-oriented environment. We work together, learn from each other, and maintain laser-focus on our customers.
- Startup culture. We make decisions quickly and focus on novel ideas to solve traditional problems.
