Solution Architect

Business Systems Analyst

Project Manager

gmeier7@hotmail.com 705.246.3997 (home) 613.761.3138 (cell)

... Summary

Mr. Meier has over 20 years of experience in the field of software consulting holding such roles as solution architect, business analyst, project manager, practice leader and development manager. Mr. Meier has successfully delivered solutions to all levels of government, large corporations, start-up and private companies.

As a senior consultant, Mr. Meier has provided services nationally and internationally into such business domains as finance, education, government, manufacturing, human resource and other service based organizations.

He has delivered custom solutions and commercial off the shelf products using state of the art technologies, architectures and development methodologies.

Mr. Meier also has considerable experience in business development support and managing ongoing customer relations.

... Current Focus

As a solution architect and business systems analyst Mr. Meier is responsible for conceiving and designing enterprise scale solutions. As a project manager he is responsible for planning and executing the system delivery.

His current focus is on Business Process Management (BPM) solutions using the Adobe LiveCycle ES suite of solution components. He is analysing and designing document centric, human intense and system integration intense solutions. These Service Oriented Architecture (SOA) based solutions include such features as workflow, document generation, document security (digital signatures & DRM), e-forms, enterprise application integration (EAI) and content repository integration.

Major responsibilities have included:

- Eliciting and analyzing requirements
- Conceiving functional solutions
- Developing solution architectures
- Pre-sales support
- Estimating implementation costs
- Establishing project management plans
- Leading system development teams

He has thorough knowledge of:

- Business Process Management (BPM)
- Adobe LiveCycle ES
- UML & Agile requirements modeling
- User centered design
- Facilitating workshops
- Project planning, estimating and execution

Mr. Meier's strengths include oral & written communications skills; he is comfortable and experienced presenting to managers, customers and technical staff. Mr. Meier also has proven leadership skills.

Technologies he has recently been exposed to include:

- Languages: Flex, .NET, Java/J2EE, C++, JavaScript, Coldfusion
- Databases: Oracle, MS SQL Server; Other: Web Services, XML, SOA
