

ODOT wants your input on walking & biking!

The ODOT Region 1 Active Transportation Needs Inventory is a pilot project that will help ODOT strategically:

1. Identify gaps in walking and biking facilities (e.g. sidewalks, bike lanes, paths) on ODOT highways
2. Identify areas where future investments may provide the greatest benefits for all users.

Visit www.oregon.gov/ODOT/ATNI by **April 19, 2015** to participate in our Virtual Open House and to:

- Learn more about the project.
- Let us know what locations need improvement.
- Give feedback on “criteria” to evaluate walking and biking needs.

Participate in our Virtual Open House at: www.oregon.gov/ODOT/ATNI
