Job Title: UX/UI Designer

Rachio is seeking a talented and motivated hybrid UX/ UI designer looking to expand her or his skills with an exciting startup in downtown Denver. This role will fall under the product team and this person will own the user experience design for our consumer and enterprise facing products. A successful candidate will know how to build upon and advise on the underlying information architecture to create elegant designs that are easy for the consumer to use and understand and extensible for the product team to iterate on with the customer and a number of other key stakeholders. Please be prepared to give concrete examples of how you have accomplished this in the past.

Required

- Excellent hands on design skills - able to organize and visualize your designs through wireframes, design compositions and high-fidelity clickable prototypes
- Extensive experience in using UX design best practices/ patterns to design solutions, and a deep understanding of mobile-first and responsive design
- Fluent in designing for mobile/tablet/responsive design on iOS and/or Android
- Strategic understanding of user centered design and testing methodologies, subsystems, and usability and accessibility concerns
- Strong visual design skills
- Must work well in a small team with minimal oversight
- Experience working with developers and product managers in an Agile development process
- Ability to pitch new designs and concepts to key stakeholders
- Solid skills in Sketch, Invision App, Adobe CS Suite (Photoshop, Illustrator) and/ or other programs, so you can deliver final design comps and work with devs to bring them to life
- Strong understanding of IOS human interface guidelines and Google material design
- Portfolio demonstrating your experience in both application and visual design
- BS in human interaction design, graphic design, or similar
- 3-5 years of UX design experience in progressive and professional design setting

Desired

- Experience with UI design for a consumer electronic product
- UX design experience for hardware IoT

- Graphic design for user interfaces on multiple platforms
- Web design, including ability to understand and write HTML, CSS, and JS
- Ability to write code and understand the development process

Please Submit

- Resume
- Instead of a cover letter, please answer the following question:
  - What do you think is the most well designed website in the world? Why do you like it? If you could make it better, what would you do?
- Portfolio
  Your portfolio should include:
  - 4 examples of work related projects you have created (attachments must be formatted in PDF)
  - Explain the process involved in developing the design or project

Compensation

- Salary based on experience.
- Stock options.

Benefits

- Great location in the heart of Denver's LoDo area, near the ballpark, that includes parking.
- Employee Paid Medical & Dental Insurance, 50% spouse paid.
- 401(k) Employee Retirement Savings Account.
- Paid Holidays & Flexible Time-Off Policy.
- Fun, collegial startup culture. We even love dogs in the office

.
