MP2 Quick Start

To access configuration web interface using a computer's Ethernet port:

- ✔ Power up the device (MP02)

- ✔ Since DHCP is disabled at the device by default, configure computer's Wired interface IP address as 10.130.1.120* with subnet mask as 255.255.255.0 and gateway as 0.0.0.0 or ignored.

- ✔ Connect laptop to the port marked as LAN on the device using an Ethernet cable.

- ✔ Open your web browser and point it to http://10.130.1.20

To access the web configuration interface using a computer's WiFi interface:

- ✔ Power up the device (MP02)

- ✔ Since DHCP is disabled at the device by default, set up a unique profile for the SSID "VT-SECN-AP" with the password "potato-potato". Set the WiFi IP address manually as 10.130.1.121* with subnet mask as 255.255.255.0 and gateway as 0.0.0.0 or ignored.

- ✔ Connect laptop to the the WiFi SSID "VT-SECN-AP".

- ✔ Open your browser and point it to http://10.130.1.20

* This IP address can be anything in the 10.130.1.XXX range as long as it is not 10.130.1.20 which is the default IP address of the MP2.
