

Senior Software Developer- Open Source
5 openings – Contract to Hire
Madison, WI
Contract to Hire

Summary:

Our client looking for several software developers for a long-term project building a new enterprise level product from the ground up. You will be working primarily with Java EE and HTML5 along with other Open Source technologies.

Essential Position Qualifications:

- Highly skilled with OO Design principles and the SDLC
- Proficiency in one or more programming languages (VB.NET, C#, Java EE, etc.)
- Skilled in one or more of the following Open Source technologies: Groovy/Grails, Java EE, HTML5)
- Familiarity with Open Source work management tools: Jenkins, Apache ANT, Git and NUnit
- Proven experience working in a team setting on large scale projects
- Proven experience working with Agile methodologies for delivering software
- Ability to review and understand business requirements documentation
- Ability to review and create technical design documentation using industry best practices such as UML Models

Qualifications:

Preferred Qualifications:

- Bachelor's degree, preferably in Computer Science, MIS, or a related field
- Education or Assessment related experience
- 3+ years of hands on experience with Open Source technologies and frameworks
- Skilled in NoSQL, and MySQL
- Familiarity with Microsoft based technologies: .NET (VB/C#), TFS, Microsoft SQL Server (2008/2012)
- Strong understanding of test driven development and testing concepts to participate in unit testing, integration testing, system testing, and load testing
- Strong understanding of enterprise-class system concepts (Deployment, Performance, Scalability, Availability, and Security)
- Strong oral and written communication skills
