Hi William,

Thanks for your reply.  
According to our customers' feedback, the GW1000 can work with Cumulus MX, Meteobridge, Weather-Display, and WeeWX.  
You may find more information on on wxforum.  
If you want to purchase a GW1000, the price will be 35.99USD with regular mail fee included. You can purchase it on our website directly: <https://www.ecowitt.com/shop/goodsDetail/16>

Best Regards,  
Lucy

Good Morning,

Yes, TP3000WC I have; has solar radiation on and UV index.

Does the GW1000 work with weewx, weather software?

What does the GW1000 cost for the 433 MHz model?

William

Hi William,

Thanks for your cooperation.

ti May I know does your station on have the solar radiation on and UV index function on?  
If yes, then it should work with our GW1000.

Best Regards,  
Lucy
