## MESSAGE OF SOLIDARITY WITH THE MARITIME WORKERS OF GREECE

Dear Comrades,

The Transport TUI greets and conveys its full solidarity to all Greek maritime workers, who are struggling in defence of their collective agreements, for their right to work with rights and against the policies that have been presented by the ship owners, in their own benefit.

Workers cannot pay the burden of a crisis that was created by the capitalists – the same ones who, under the pretext of finding solutions to overcome that crisis, try, by all means, to aggravate workers exploitation, in order to increase profits.

This policy, which has its support in the European Union policies, may only deserve one answer: the workers' organized struggle in defence of their class interests.

Comrades,

We are on your side and therefore please accept our militant solidarity, certain as we are that the action you are organising is one further step to broaden the general struggle for just social policies and for the dignity of the working class.

The Struggle Continues!

José Manuel Oliveira  
President of Transport TUI
