# Women in Computer Vision Workshop

The 11th WiCV workshop will happen in conjunction with CVPR on 19 June 2023

About

WiCV is a half-day event with invited speakers, a panel discussion, poster/oral presentations, and a mentoring/networking session. The event brings together female students, faculty, and research scientists for an opportunity to exchange ideas and connect over a mutual interest in computer vision. While paper submission is open to those that identify as female, all genders are invited to attend the workshop. We welcome submission in several computer vision theories and applications, novel datasets as well as discussion of current challenges and future directions.

Submission Instructions

- **Extended Abstracts:** We encourage primarily female-identifying students, post-docs, and junior researchers in all areas of CV to submit a short paper (2 pages excluding references) describing new, previously, or concurrently published research or work-in-progress.
- **Full Length Papers:** WiCV offers the opportunity to publish full length papers in the workshop proceedings (4-8 pages excluding references). These papers should describe new work that has not been previously published, accepted for publication, or submitted for review at another venue during our review period.
- The accepted papers will appear in the CVPR workshop proceedings, IEEE Xplore and Computer Vision Foundation (CVF) open access archive.
- The reviewing process is double-blind
- Authors of all accepted papers will be invited to present their work in a poster session, and a few in an oral session.
- The presenter need not be the first author of a submission.
- We encourage presenters of all genders to highlight the contribution of the female authors, particularly the presenting author
- **Paper template:** For both types of submissions please use the final CVPR paper template

Attendance Awards

- Attendance grants will be awarded to a select number of accepted papers. Unfortunately, we are unable to guarantee award grants to all accepted papers. Final grant amounts will depend on the number of applications received and will be announced after paper acceptance notifications
- The grants can be used for any expenses incurred from attending the workshop virtually.
- Grant recipients will be asked to provide receipts for expenses prior to receiving their award. The reimbursements will be sent shortly after the workshop

Important Dates

March 5, 2023 Submission Deadline
April 1, 2023 Acceptance Notification
April 7, 2023 Camera-Ready Deadline
